## t. Medina Says Neither Ordered Saw Massacre

GTON, Dec. 4 (UPI).—Capt. Ernest L. Medina, commander of the infantry company involved in the alleged My Lai massacre, denied today that any "slaughter" was ordered by him, or reported to him.

At his first news conference after testifying at a closed hearing, Capt. Medina said that reports of the massacre were very biased, unfair to myself and every other soldier in

reports have not been fair to the men who have served honorably," he said. "I did not see a slaughter and ordered by me or reported to me."

Medina said that his own report of the engagement said 28 civilians had been killed. The total of enemy dead said.

Medina, in uniform, appeared with his attorney, F. Lee Bailey said that he was allowing his client to make a briefly because purported eyewitness accounts had accused of shooting a child.

he had shot any children, Capt. Medina replied, "No,

again conceded that he shot a woman during the engagement plained that the woman had been reported to him as an Viet Cong. He shot instinctively as he had been trained and, when he believed his life was in danger.

ges have been filed against Capt. Medina by the Army. liam L. Calley jr. has been charged with the murder of at My Lai.

Medina said that the woman had already been wounded when he reached her. He had turned when he detected movement out of the corner of his eye and "instinctively turned and fired two shots," he said. "I assume I killed her," he added.

The company commander said that he was not with the first unit that moved into the hamlet of My Lai, where the alleged massacre occurred on March 16, 1968.

The engagement began with an artillery bombardment at 7 a.m., he said. At 7:30 a.m., the first helicopters landed assault troops.

**Arrives After Attack**

Capt. Medina himself established a command post outside the village and did not reach My Lai until sometime after 10 a.m. He said that he left shortly after noon.

Capt. Medina testified before a special Pentagon board headed by Lt. Gen. William Peers after the board heard testimony from Chief Warrant Officer Hugh Thompson, the helicopter pilot who made the first complaint about what happened at My Lai. Mr. Thompson was credited with saving the lives of 16 children.

The board has been specifically ordered to determine whether there had been a cover-up after the My Lai operation.

"I did see some bodies of women and children," Capt. Medina told the news conference. "They were among the 20 to 28 civilian dead I reported."

Capt. Medina said that after the first assault troops landed he asked whether the landing zone was "cold" (clear of the enemy), and received the reply "negative, negative. Viet Cong with weapons running from the place."

"I saw that the landing zone was hot," he said, "and ordered the troops to return their fire and engage the enemy."

Capt. Medina said that the intelligence reports provided him indicated that there would be no women and children in the hamlet at the time the engagement began. He said that the reports were that the women and children would have gone to market at that time.

Mr. Thompson refused to reply to newsmen's questions when he left the hearing room at 1:35 p.m. except to say that "I can't say that I did," when asked whether he had used his helicopter to rescue the children.

Before Mr. Bailey arrived at the hearing room, he conferred with chief counsels for the Army and the Defense Department about Capt. Medina's "status and his ability to defend himself" against public statements already made.

Asked whether he thought Capt. Medina had been damaged by public statements, Mr. Bailey replied, "Yes." He specifically denied a report by one purported witness that Capt. Medina had shot a wounded 4-year-old boy in the face.

**Robb's Men Accused**

Sen. Charles H. Percy, R., Ill., forwarded to the Pentagon today a letter alleging that atrocities similar to those said to have occurred at My Lai were committed by marines under the command of former president Lyndon B. Johnson's son-in-law.

The letter was written by one

### Has Farewell Tea With Hanoi Envoy

## *Lodge Trades Final Shots in Paris*

By Jonathan C. Randal

PARIS, Dec. 4 (WP).—Outgoing U.S. Ambassador Henry Cabot Lodge today took tea with his Hanoi counterpart at his final appearance at the deadlocked Vietnam peace talks, but little mutual sympathy emerged from the farewell courtesy visit.

The U.S.-initiated half-hour meeting between Lodge and Xuan Thuy took place during the normal lunch break of the weekly negotiating session, but a Hanoi spokesman said "nothing that merits attention" transpired.

Asked why Mr. Thuy had accepted the offer in the light of the two ambassadors' increasingly acerbic relations, the spokesman said "it was a question of *savoir-vivre*."

At the conference itself it was a question of Mr. Lodge and Mr. Thuy trading some of the toughest language heard since the four-power talks began last January.

Mr. Lodge dusted off a variant of the old "domino theory" that had fallen into disuse in the last year. He charged that the Communists were seeking to "discredit the U.S., so as to shake the confidence of smaller countries . . . in the value of American friendship and to shake the confidence of Americans themselves in their capacity to help these smaller countries."

When Mr. Lodge linked this Communist strategy to a desire to be in the vanguard of the "world revolutionary movement," Mr. Thuy replied that the United States was still trying to become "masters of the world and world gendarmes."

The North Vietnamese contrasted Mr. Lodge's performance both today and since he took over the U.S. delegation in January with oil lamps "which shine brightest just before they go out."

But "Lodge's statement remained just as black and shadowy today as the statements at the 44 previous meetings," a Hanoi spokesman said.

**Congress Resolution**

Mr. Thuy also questioned the value of the recent congressional resolution backing President Nixon's peace-making efforts and compared it with the congressional "Tonkin Gulf" resolution in August, 1964.

"Among the people who voted the [new] motion of support there were those who completely supported Nixon," Mr. Thuy said, "and others who voted without understanding it."

The Tonkin Gulf resolution, he said, "was an error which permitted President Johnson to escalate the war and cause much mourning for the Vietnamese and American people and led Johnson to serious failure."

In an angry exchange over the alleged American massacre of Vietnamese civilians, Mr. Thuy charged that the U.S. was guilty of "thou-

## Suit Names Nixon, Romney As Patronage Case Brews

By Robert B. Semple Jr.

WASHINGTON, Dec. 4 (NYT).—Attorneys for Raymond H. Lapin, who was discharged Tuesday from his post as president of the quasi-public Federal National Mortgage Association, filed suit in U.S. District Court yesterday against President Nixon; George Romney, Secretary of Housing and Urban Development; and members of the FNMA board of directors.

The complaint asked for a declaratory judgment that the President's dismissal of Mr. Lapin from his post be rendered null and void because Mr. Nixon had failed to show "good cause" for his action as required by law.

The suit was accompanied by a request for a temporary restraining order aimed at preventing the board of directors of the association—known as Fanny May—from interfering with Mr. Lapin's duties as president until the court could judge the case on it merits.

The suit against the President is just part of what has become one of the year's most bitter struggles over political patronage. Mr. Lapin, a Democrat, has charged that Mr. Nixon fired him without sufficient cause so that he could give the Fanny May post—which will pay a salary of at least $62,000 next year, to a Republican.

There were two other prominent developments in the case.

First, it was learned on good authority—and later confirmed by Mr. Lapin—that he had sent a letter Nov. 9 to an undetermined number of persons doing business with Fanny May in an attempt to solicit funds for the campaign of Rep. Richard T. Hanna, California Democrat who is up for re-election next year.

"We're sure you'll all agree we

## Armstrong Gets Peace Corps Post

WASHINGTON, Dec. 1 (UPI).—President Nixon yesterday appointed astronaut Neil Armstrong, the first man to walk on the moon, chairman of the Peace Corps National Advisory Council.

Mr. Armstrong succeeds former Vice-President Hubert Humphrey as chairman. He will continue working with the space program, and will work only part-time with the advisory council.

There is no compensation for service on the advisory council other than $50 a day to cover expenses when meetings are held.

## Hundreds Flee As High Waves Hit Hawaii Again

HONOLULU, Dec. 4 (UPI).—Forty-foot-high waves smashed into the Hawaiian Islands today, flooding highways and forcing hundreds from their homes.

It was the third attack by the high waves from a series of violent Pacific Ocean storms packing unusually high surface winds. The winds, up to 60 mph, scooped up the water like a bulldozer and sent it surging onto the island shores.

Heavy waves were expected to continue during the night and 600 residents of low-lying areas on the north side of Oahu, 23 miles from Honolulu, were evacuated to higher ground.

On Kauai, 100 miles north of Honolulu, the giant waves crushed a house and garage. No injuries were reported. Roads on the island beach areas were awash.

# U.S. Takes Hard Line On East-West Meeting

By Dan Morgan

BRUSSELS, Dec. 4 (WP).—The United States made clear to its NATO allies today that it does not want an East-West conference on Europe unless the Soviet Union shows it is ready for substantial progress on specific questions.

The American position on the Soviet-sponsored proposal for a "security conference" was presented by Secretary of State William P. Rogers to the North Atlantic Treaty Organization foreign ministers, whose meeting revealed widely varying ideas on how to respond to the Communist overture.

While holding open the possibility of a Europe-wide meeting, the secretary's speech left no doubt that Washington does not share any of the enthusiasm of some of its allies for using the conference as a starting point for broader relaxation efforts.

It is now considered likely that the 15 delegations will reach a compromise tomorrow in the form of a special declaration attached to the routine communiqué, approving in principle an international conference and suggesting East-West talks on mutual troop reductions by both sides in Europe.

The gist of efforts here was to avoid rejecting the conference outright while providing enough subjects for more study to keep the pace toward it slow.

**Three Key Tests**

Mr. Rogers named three key tests of whether the Russians wanted real results. These were relieving tensions in and around Berlin, positive responses to the Eastward initiatives of the West German government, and Communist reaction to the troop-reduction idea.

Mr. Rogers was said to have seriously questioned the idea of a mammoth meeting in Europe, and suggested that it could have the same air of unreality as the Soviet proposals in the 1950s for complete and general disarmament.

He said that the Soviet Union could gain merely by convening the conference and that the United States need not feel ashamed at raising questions in light of its own respectable record of working toward security in Europe. Communist proposals to date, including the most recent one in Prague on Oct. 31, were described as too vague.

The secretary was reported to have warned that real chances for concrete steps would be set back if the conference was premature or ill-prepared.

At the same time, he tried to make clear that American foreign policy in Vietnam, and elsewhere, was not retreating into isolationism.

Because the key tests he named will depend in large part on how the Russians and their Eastern allies respond, the conferees were keeping telephone lines buzzing today, to Moscow, where Communist leaders met at a Warsaw Pact summit meeting.

The initial reaction here to the end of the Moscow talks was that the Communist leaders may have been as divided as their NATO opposites on how to move next.

The idea of mutual troop thinouts was first suggested at Reykjavik in mid-1968 and the United States wants to reactivate the idea after the setback of the Czechoslovak invasion. The defense ministers agreed yesterday to make a study of the actual balance between the two military blocs.

The three Western powers in West Berlin are expected to make a new proposal for talks with the Russians on that problem within a couple of weeks, and the Bonn government is awaiting a reaction from Moscow and Warsaw to its proposal for bilateral talks.

The wide spectrum of views here flowed from differences on whether a big conference would clear or hinder the path toward reducing specific points of tension.

On the positive end were the views of Foreign Minister Poul Hartling of Denmark, who told his colleagues today that the important thing was to get the process of talks started, with NATO making an active contribution. He

### At Moscow Meeting

## *Warsaw Pact Leaders Praise Bonn Regime*

MOSCOW, Dec. 4 (UPI).—East Europe's Communist leaders today spoke warmly of West Germany and urged that "peaceful coexistence become a universal norm" in European relations.

The Warsaw Pact leaders praised the election of a Social Democratic government in West Germany, but the brief communiqué issued at the end of a two-day pact meeting also demanded that Bonn recognize East Germany's borders before mending its fences with the rest of the Communist world.

The communiqué released by the Soviet news agency Tass appeared, however, to hedge on the issue of whether Bonn must actually give recognition to East Germany.

Nor did it repeat the earlier Warsaw Pact call for an all-European security conference in the first half of next year.

**Eye on NATO**

The communiqué indicated that the pact leaders met with one eye on the North Atlantic Treaty Organization talks in Brussels.

It said the European Communist nations are "permeated by the resolve to develop their contacts with the other states in Europe who desire to cooperate on the basis of these principles."

The election of the Brandt government in West Germany, it said, "expressed the changes that have taken place in a part of public opinion there and, moreover, the growth of the tendency in this section of public opinion which is aimed at the realistic policy of cooperation and joint understanding among the states."

Referring to East Germany, it went on: "Peace and security demand that all states establish with the German Democratic Republic contacts of equal right on the basis of international law, recognize as final and unchangeable the existing frontiers in Europe, including the Oder-Neisse border."

West Germany already has hinted at its willingness to recognize the Oder-Neisse Line—the postwar border between Germany and Poland. But Chancellor Willy Brandt has said his government will not give full diplomatic recognition to the East German regime.

**Question of Meaning**

What the communique meant by "equal right on the basis of international law" was not explained. If it turns out to mean something less than diplomatic recognition, it could mean that the Soviet Union has given its allies the green light to expand their contacts with Bonn —something many of them want to do.

The communiqué hailed West Germany's signing of the nuclear nonproliferation treaty, but warned of "the activation of neo-Nazi forces in West Germany."

The meeting was called to discuss the problems raised by Mr. Brandt's overtures to Eastern Europe.

The omission of any reference to the security conference was not taken here to mean that the Communists have dropped the idea. It was thought that, while Moscow still very much wants such a conference, it recognized warnings from Brussels that it probably will be impossible to hold it next year.

The meeting brought together Communist party leaders, premiers and foreign ministers of all Warsaw Pact nations.

## U.S. Said to Be Vexed at Bonn For 'Unilateral' East Policy

By David Binder

BONN, Dec. 4 (NYT).—Authoritative sources said today that the U.S. government is annoyed with West Germany's new leaders for allegedly failing to consult it adequately about Bonn's current initiatives toward Communist Europe.

The U.S. minister here, Russell Fessenden, delivered a memorandum a week ago to the Foreign Office complaining that the Brandt government had insufficiently informed Washington about its note to the Soviet Union last month.

German officials angrily described the American message as a diplomatic maneuver. It was said to have been launched not by the State Department but by persons in the White House close to President Nixon's German-born adviser on foreign affairs, Henry A. Kissinger.

For the last four days the German press has carried stories about "concern" in Washington over the Brandt government's Eastern policy, but has attributed the reports to the State Department.

**Rogers Visit**

This afternoon the chief government spokesman, Conrad Ahlers, said at a news conference that the visit here tomorrow of Secretary of State William P. Rogers was "not prompted" by U.S. concern over the initiatives in Eastern Europe. However, he agreed that "Eastern policy" would probably be one of the topics discussed by Mr. Rogers and Foreign Minister Walter Scheel and Chancellor Willy Brandt on Saturday.

In the view of Bonn, the note that West Germany recently sent to the Soviet Union was an almost inconsequential message that merely agreed to a Soviet suggestion that talks on the renunciation of force be held in Moscow. It added that Dec. 8 might be a convenient time to start the talks. The original proposal for such a pact was made by Bonn three years ago and has been exhaustively publicized.

It was the first time in the memory of officials here that the United States had questioned the willingness of its most important European ally to consult. In the past it has been the West Germans who have complained about being inadequately consulted—most recently on U.S. actions with regard to the nuclear nonproliferation treaty.

German and American sources indicated that last week's U.S. complaint was merely a pretext for a statement of a much more fundamental policy by the United States on Germany.

The essence of this, they said, was that the White House objected to unilateral West German moves which could puncture the "umbrella" of Western responsibility for any issues affecting Germany as a whole.

The Germans have the impression that the White House is also deeply concerned lest its own talks with the Soviet Union on strategic arms limitations and other major East-West questions be somehow disturbed by unilateral West German moves.

## *FTC to Study Enzyme Soaps As Possible Health Hazard*

WASHINGTON, Dec. 4 (Reuters).—A study of possible health hazards from biological washing powders—the enzyme-active detergents—has been ordered by the Federal Trade Commission.

The agency said that from studies made in the United States and Britain, it appeared that workers in factories making such detergents have had a variety of health problems, including dermatitis and flu-like symptoms.

It is not known, the FTC said, whether consumers, who are exposed to the detergents in much smaller concentrations, can suffer ill-effects.

The study will be carried out by the FTC's staff.

**Appeared in 1967**

Enzyme-active detergents first appeared on the U.S. market late in 1967 and have gradually wooed housewives away from other detergents.

Enzyme powders now account for about 70 percent of the detergent market in the United States.

The agency said that its data on exposure to high-concentration enzymes in detergent factories had been gathered in England and the United States.

A spokesman said that the agency had collected scientific articles on the subject from British medical publications, such as the Lancet.

**Warning May Be Needed**

The announcement said that the purpose of the investigation was to see whether prolonged use by consumers would be sufficiently hazardous to justify requiring manufacturers to warn purchasers of possible ill-effects.

Under the Federal Trade Commission Act, the FTC could require such warnings in advertisements and on labels.

In October, the U.S. government announced a ban on the artificial sweetener cyclamate in food and drinks. Last month it decided to restrict the use of DDT because of possible health risks.

# 62 Killed as Air France Jet Crashes in Sea Near Caracas

CARACAS, Dec. 4 (UPI).—An Air France jet carrying 62 persons crashed in flames in the Caribbean minutes after takeoff from Maiquetia International Airport last night. Officials said there were no survivors.

"I am losing altitude and I cannot control the plane," Capt. Roger Valter radioed the control tower from 4,500 feet, two minutes out of Maiquetia. Witnesses saw a fireball blossom over the Caribbean four miles northwest of the airport.

Air France said the Boeing-707 was Flight 212, which originated in Santiago, Chile, and was headed for Paris with stops in Lima, Peru; Guayaquil, Ecuador; Bogota, Colombia; Caracas; Pointe-à-Pitre, Guadeloupe; and Lisbon.

Air France said the plane carried 41 passengers and a double crew of 21.

Of the 18 passengers who boarded at Maiquetia Airport, five were Venezuelan students on scholarships to Romania. Officials said earlier the rest of the 19 included a Czechoslovak diplomat, eight Frenchmen, two Spaniards, a Syrian, a Yugoslav and an Austrian.

In Paris, Communist party headquarters said one of the victims, identified as Gene Evremont, was secretary-general of the party in Guadeloupe.

An officer of the fire department at La Guaira, a port city near Maiquetia airport, said 26 bodies had been recovered. He said the bodies, still not identified, were taken to the morgue at La Guaira's Vargas Hospital.

Earlier a search spokesman said the first ten bodies recovered were "in almost perfect condition, but showed head injuries, apparently caused by the violent impact of the crash." He said there were no survivors.

President Rafael Caldera of Venezuela watched the search from the nearby port of La Guaira, adjacent to Venezuela's foremost resort area. It includes a group of luxury hotels where the International Air Travel Association is meeting to decide new transatlantic fares.

Capt. Jose Cabezas of the Venezuelan domestic airline Aeropostal Venezolana said his plane was 2,000 feet above the Air France jet. "I saw the explosion that took place as the plane hit the sea," he said.

## *Moon May Be Collection of Space Rubble*

HOUSTON, Dec. 4 (AP).—The moon may be a dead collection of space rubble instead of a solid-structured body with internal movement such as the earth, a scientist says.

Dr. Gary Latham, in charge of a seismograph experiment left on the moon by the Apollo-12 astronauts, said yesterday that signals from the instruments indicate the moon "may be a highly broken structure—a pile of rubble."

"How deep the rubble, we're not sure," he said. "We may be talking of depths up to 10 kilometers (6.2 miles). We may be dealing with rubble clear to the center of the moon."

Dr. Latham said the impact of the ascent stage of the Apollo-12 lunar module caused ground shock detected by the seismograph for an hour. Such a shock on earth, he said, would last "perhaps two minutes."

He noted that the rubble theory was only tentative and that there have been other suggestions. Rubble, however, he said, seems to be the most plausible.

# 125 MPs Urge Policy Shift On Nigeria

## U.K. Called On to Back Total Arms Embargo

By Alvin Shuster

LONDON, Dec. 4 (NYT).—The British government came under new pressure today to halt its arms shipments to the Nigerian government and to take the lead in calling for an embargo on weapons to both sides in the civil war.

The latest sign of discontent over present British policy came in Parliament where more than 125 members signed a motion calling for a change in the government policy of total support for the Nigerian federal regime in its struggle against secessionist Biafra. The motion also calls on Britain to press for "an immediate and total" Nigerian arms embargo at the United Nations.

Faced with the increasing unhappiness in Parliament, particularly from members of his own Labor party, Prime Minister Harold Wilson today sent Maurice Foley, parliamentary under secretary at the Foreign Office, to Lagos. The Foreign Office said Mr. Foley went at the request of the Nigerian government.

According to officials, Mr. Foley will discuss the problem of relief supplies to end the starvation of the war's victims and the peace moves by the Organization for African Unity and others. It is the first high-level visit by a British official since Mr. Wilson's trip last March.

The Conservative opposition is also showing signs of wavering in its general support of the policy of continued arms shipments to Lagos. At the request of Edward Heath, the Conservative party leader, Lord Carrington, the Tory leader in the House of Lords, also left today for meetings in both Biafra and Lagos.

The moves by both party leaders came as Parliament prepared for a two-day debate next week on Nigeria.

## Scotland Yard Suspends Four

LONDON, Dec. 4 (UPI).—Scotland Yard today suspended from active duty four detectives, three of whom were alleged by a London newspaper to have accepted bribes from criminals.

A Scotland Yard spokesman identified the four suspended officers as Bernard J. Robson, Gordon F. Hargis, John Symonds and Harold Hughes.

In a story published Saturday, The Times alleged that Detectives Robson, Hargis and Symonds had accepted bribes from criminals and encouraged criminals in lawbreaking. Detective Hughes was not cited by The Times. The Scotland Yard spokesman said, however, that he was also being suspended in connection with The Times' allegations, which have been under investigation since Saturday by Scotland Yard's chiefs.

ON EXTERNAL AFFAIRS—Foreign Ministers of five NATO countries chatting in Brussels. From left: Secretary of State William P. Maurice Schumann, of France; Joseph Luns, of Holland; Michael Stewart, of Britain, and Walter Scheel, of Germany, at a luncheon y

# U.S. Takes a Tough Line On East-West Conference

(Continued from Page 1)

visualized continuing bilateral and multilateral contacts leading to a possible series of conferences.

Among some European officials there was a feeling that since the United States and the Russians are negotiating in Helsinki on strategic armaments, the Europeans have a right to negotiate too. One Dutch official said there was disappointment with the cautious U.S. position, which seemed to him to indicate a backing down from President Nixon's concept of "negotiation rather than confrontation."

The West Germans appeared to be somewhere in the middle. The Bonn government, which has a special problem with the question of East German participation in a European conference, wants progress at a bilateral level first. However, Foreign Minister Walter Scheel has made clear here that if the two halves of Germany could reach a modus vivendi the problem of East German participation would be less complex.

He said that NATO should keep the initiative on the European security proposal by sending out signals of the kind made in Reykjavik in 1968.

British Foreign Secretary Michael Stewart, speaking with American, West German and French colleagues last night, broached the idea of establishing working groups to develop positions on issues for a forthcoming all-Europe meeting.

It was not clear how this idea differed from NATO's policy of cautious bilateral preparations already adopted last April. The idea found support from a number of speakers at the plenum here, however.

## *Superbaby Lives To Ride Again*

LONDON, Dec. 4 (UPI).—A truck went out of control yesterday, hit a baby carriage containing Julie Whymark, two years old, and smashed it against a wall as her mother looked on in horror.

Then, from the debris, came a giggle.

The child had escaped without a scratch. Her mother, Mrs. Valerie Whymark, 22, was treated for shock.

# *France Plans to End Boycott Of Western European Union*

BRUSSELS, Dec. 4 (AP).—France has followed up its Hague commitment to negotiate Britain's entry into the Common Market with a decision to end its boycott of the Western European Union (WEU), French sources reported today.

Pierre Harmel, Belgian president of the Ministerial Council of WEU, submitted to his six partners proposals to enable France to participate again in all the WEU's work, a Belgian spokesman said.

The spokesman declined to give details of the proposals but expected all countries to respond favorably.

Some allied diplomats were quick to view this as another important step by President Georges Pompidou toward re-establishing French cooperation with the Western allies, interrupted by former President Charles de Gaulle.

French sources stressed that this move toward cooperation will not involve reintegrating France within the military command of NATO.

However, they said, France was ready to coordinate possible employment of its Pluto tactical nuclear weapons with its allies. The Pluto missiles, with a range of up to 120 kilometers, will be operational within months.

Talks to this effect were undertaken during a visit to Washington last month by Gen. Michel Fourquet, chief of the French General Staff, the sources said.

They also reported that Gen. Fourquet discussed plans for U.S. support of French units in West Germany in the event of an attack from the East.

The decision on the WEU means France will send a representative to the quarterly meeting of the WEU Council of Foreign Ministers in Brussels Dec. 18-19.

WEU links France, West Germany, Italy, Belgium, Holland and Luxembourg—the Common market nations—with Great Britain.

It was formed in 1954 to contain a rearmed West Germany and to provide a forum for political consultation among the seven.

Gen. Charles de Gaulle withdrew France from WEU operations early this year when it appeared to him that Britain and the other WEU members were trying to use WEU as a means for forcing discussion on Britain's application to join the Common Market.

# Wilson Says Britain Is Ready To Negotiate on EEC Entry

LONDON, Dec. 4 (AP).—Prime Minister Harold Wilson said today that he hoped negotiations on British entry into the European Common Market would open before next July.

Mr. Wilson told the House of Commons: "We are ready for negotiations as soon as the Six [Common Market members] are ready."

The prime minister was making his first public comment on the Common Market summit that decided in The Hague Tuesday to try to open talks with Britain by July. Mr. Wilson said that he hoped July was "the latest date."

"I would hope they would be reasonably speedy," he added. "There is a desire in Europe, as well as here, that there will not be long and tedious negotiations about a lot of small matters—many of which are capable of solution after entry if we get the right terms—but negotiations concentrated on the main issues."

**Wilson Sees Official**

Mr. Wilson spoke before he held private talks tonight with French Finance Minister Valéry Giscard d'Estaing, the first French cabinet minister to visit London since the Hague meeting. Mr. Giscard d'Estaing conferred earlier today with Chancellor of the Exchequer Roy Jenkins on the Common Market and on monetary problems.

British officials were forecasting privately that if talks opened by July, Britain could join the Common Market by 1972. The Conservative leader, Edward Heath, had forecast longer negotiations, with Britain unlikely to enter the community before 1973 or 1974.

Mr. Wilson took a cautious line as questioners suggested that there still might be continued resistance by France, which has twice vetoed the British bid.

Decisions made at The Hague, he said, "represent a step forward, but we must be on the watch against any dragging of feet and excessive hardening of positions on other issues between now and the opening of negotiations."

Mr. Wilson said that he regarded the Hague meeting "in the spirit of 'so far so good'" and said that the only way Britain could be sure of its prospects for joining was "to have a go" and enter negotiations.

He called the Common Market agricultural policy "the crunch of the issue." Britain is expected to seek terms that will soften the blow of accepting higher food prices.

## Conservatives Capture Labor Seat in Britain

LONDON, Dec. 4 (UPI).—The opposition Conservative party today captured another Labor seat in Parliament by winning a by-election in Wellingborough by a 6,049 vote majority.

The swing from Labor to Conservative was 9.7 percent.

One other seat in Parliament was being filled in a by-election today, Louth, which was considered certain to stay in Conservative hands.

The Tory victory in Wellingborough cut Labor's majority in the House of Commons to 66 seats. Labor now has 345 seats and the Conservatives 261.

It was the 12th Labor seat won by the Conservatives in elections held to fill vacancies since the March, 1966, general election. The Conservatives have lost only one of the ten seats they have defended since 1966.

## Calif. Candidate

LOS ANGELES, Dec. 4 (UPI).—Assembly leader Jesse Unruh, depicting himself as a poor boy from Texas and Gov. Ronald Reagan as a puppet of millionaires, announced today his candidacy for governor.

# *Allies Pursue Over Border Of Cambodia*

SAIGON, Dec. 4 (UPI).—Allied air and ground forces have pursued a North Vietnamese battalion into Cambodia after an all-day battle on the border, South Vietnamese sources said today.

Reports from the front said the North Vietnamese battalion came out of Cambodia early yesterday and tried to overrun a border town and two U.S. Special Forces camps, killing 25 South Vietnamese.

They were repulsed with 166 of their number reportedly killed and headed back across the border with U.S. jets and South Vietnamese troops in pursuit.

U.S. headquarters spokesmen said the allies had an "inherent right" to fire back if fired on from Cambodia.

U.S. spokesmen acknowledged the air raids into Cambodia, the second such strike in three weeks, but said nothing about the pursuing South Vietnamese troops.

The weekly casualty report, issued today, said 70 Americans were killed last week, the third lowest weekly toll since 1966. The total of U.S. wounded was put at 1,049.

Military spokesmen confirmed what other sources had disclosed earlier—that U.S. casualties for the war surpassed 300,000 last week, with 39,642 killed, 259,828 wounded and 1,359 missing or captured—a total of 300,829.

The North Vietnamese attacked in the Tuyen Binh sector, 58 miles northwest of Saigon, after a barrage of more than 200 mortar rounds early yesterday. The Communist force, estimated at about 600 men, was believed to have attacked from Cambodian territory only 800 yards from the outpost. Allied officials said the mortar fire also came from Cambodia.

American B-52 bombers struck today at other North Vietnamese positions around the Bu Prang Special Forces camp after the enemy had opened up with scattered mortar barrages.

**Cambodian UN Appeal**

UNITED NATIONS, N.Y., Dec. 4 (AP).—Cambodia charged today that U.S. and South Vietnamese forays into Cambodia since 1962 have killed more than 300 persons and wounded 700, and appealed for an end to "this war of extermination."

All the dead and the wounded, Cambodia claimed, were Cambodian civilians and military personnel. The charges were in a government white paper made available at the UN today.

## *De Gaulle Speeches To Be Published*

PARIS, Dec. 4 (Reuters).—Former President Charles de Gaulle has approved plans for the publication of the first complete record of his messages, speeches and official letters, his publishers announced today.

The five-volume publication, beginning next April, will start with the general's broadcast from London on June 18, 1940, calling on Frenchmen to continue the war against Nazi Germany.

It will end with his last televised speech before the unsuccessful constitutional referendum in April this year, which led to his resignation, the publishers, Librairie Plon, said.

# Capt. Medina Denies Ord Or Seeing Alleged Atr

of Sen. Percy's constituents, Anthony R. Martin-Trigona, 24, a real estate and investment broker from Champaign, Ill. He said that he visited the company commanded by Maj. Charles Robb last year while serving as a correspondent in Vietnam for the University of Illinois' newspaper, the Daily Illini.

Maj. Robb, in Las Vegas, denied the charges.

"Our policy, orders and deeds preclude such activity," he told a news conference.

"We did not participate in any type of activity that has been asserted. Our actions were quite to the contrary. In fact we bent over backwards to avoid inflicting casualties to innocent civilians."

Maj. Robb, a captain at the time of the alleged events described by Mr. Martin-Trigona, married Miss Lynda Bird Johnson, the former President's daughter, two years ago. Columnist Jack Anderson quoted him as denying Mr. Martin-Trigona's claims.

Mr. Martin-Trigona wrote that he visited Maj. Robb southwest of Da Nang 1968. He said that men said they had b "If it moves, kill it; burn it."

In following these Mr. Martin-Trigona marines had murdered namese civilians while military operations.

Reached at a Marin ference at Las Vegas told Mr. Anderson, "N was ever given. I was of any civilian casual flicted by my own tro times we took casual to restrict casualties ans."

# Paris Finale For Lodge

(Continued from Page 1)

sands and tens of thousands of Song Mys."

Mr. Lodge denounced such "wild and inaccurate charges, reiterated the White House's "abhorrence" of the alleged incident and promised that military justice was taking its course.

"In all this, I submit," Mr. Lodge said, "our policy is in direct contrast to your own deliberate use of terrorism as a matter of conscious policy."

Criticizing the Communists for their refusal to deal with the Saigon regime, Mr. Lodge pointed out that the Viet Cong's Provisional Revolutionary Government had no capital in Vietnam and that its leadership was not elected by the people.

A Viet Cong spokesman denounced his "insulting allegations" and noted that "it has happened in history that a government has not had a fixed capital because of war conditions."

He cited the case of the provisional Algerian government, which was headquartered in Tunis before Algeria became independent and said "this removed none of the representativity" of that exile government.

The only vaguely optimistic note struck during the session was a slight change in Hanoi's position concerning 62 seriously wounded North Vietnamese prisoners of war, whom Saigon offered to repatriate last month in keeping with the Geneva convention.

Mr. Thuy had rejected the offer then and demanded that all "patriots" now imprisoned in South Vietnam should be released on the spot.

But today Mr. Thuy said those prisoners "who want to go to the North must be taken to the 17th Parallel [dividing the two Vietnams] or [in boats] off the coast and freed."

World Survey Shows

# My Lai Regarded as Tragedy For America, Not Vietnam

By Henry Tanner

UNITED NATIONS, N.Y., Dec. 4 (NYT).—In much of the world's press and for many ordinary citizens the village of My Lai has become the symbol of an American tragedy, even more than a Vietnamese tragedy.

Apart from the predictable exploitation by the Communists, the atrocities allegedly committed by American soldiers have moved the world to feelings of sorrow, shock, anger and a deep fear that the continuation of the war will have a corrosive, brutalizing effect on American youth and American society as a whole.

These feelings emerge as the main theme from reports by correspondents of The New York Times from about 30 countries.

Although comparisons with wartime Nazi crimes and with crimes committed by Communist forces in Vietnam were being drawn by some, the survey showed that the great majority in most countries do not see Americans in a similar light.

**Judgments Differ**

Most persons, the survey showed, apply one set of moral judgments to dictatorships, both Communist and Nazi, and another to the United States. Although an implied tribute, this only deepened the anger and the sorrow of those who have considered themselves the friends of Americans.

"What is happening to America, arbiter of the world, with its high moral standards," an Italian university professor asked. "Are you fighting the war by the standards of your enemies?"

The reports also showed that in Europe and Asia the My Lai affair has rekindled sharp public concern over Vietnam, reversing a trend toward growing indifference that an earlier survey had found a few days after President Nixon's speech on Vietnam of Nov. 3.

Many persons linked the alleged massacre in the settlement of My Lai to what they saw as the inherent evil of the Vietnam war. They renewed their criticism of Mr. Nixon's Vietnam policies and renewed their appeals for the U. S. government to end the war.

American withdrawal now is "both a necessary act of state and a human imperative," wrote the Spectator, the Conservative-inclined London weekly, in a typical comment.

**Threat to America**

"Continued war now means a deadly threat not only to Vietnam but to the American people," an editorial in Dagens Nyheter, a respected Swedish daily, said.

From Oslo a correspondent reported that the common theme of virtually all available comment was "the war has to stop" and that one of the most urgent reasons for stopping it "is to save American youth from slow moral poisoning."

In several countries My Lai awakened memories of other wars and other atrocities — atrocities committed as well as atrocities suffered.

"The Americans have learned that the Americans in Vietnam have become the equal of the French in Indochina, Madagascar, Algeria and of the Germans at Oradour," wrote the Paris weekly L'Express, whose publisher, Jean-Jacques Servan-Schreiber, first gained prominence abroad by writing a book about a young lieutenant—himself—being caught up in the "vicious circle of violence" in Algeria.

Oradour-sur-Glane was a village in central France that was razed and its entire population killed by the Germans in reprisal for an attack by partisans in 1944.

In Germany, too, newspaper editorialists recalled not only Oradour, but also Lidice, the Czechoslovak village, and Filetto di Camarda, a village in Italy, both of which suffered atrocities.

**Spaniard Remembers**

In Spain an official remarked: "Perhaps if American writers were dealing with the civil war now they would not be so quick to draw moral conclusions from the terrible things that happened then," referring to the Spanish civil war of 1936 to 1939.

"I am shocked," a grocer in Athens said. "If atrocities like this are tolerated by the U.S. Army and we are simply told that the Reds are doing worse, one wonders what it is the Americans are fighting for in Vietnam."

"Almost every army has its killers, but these Americans have done away with the American dream of being different," said an official in Belgrade.

And in The Hague, an editorial in the Socialist daily Het Vrije Volk wrote: "The Americans have been killing the people they wanted to protect. This means the bankruptcy of U.S. Vietnam policy."

Many persons abroad noted that the American press had given detailed coverage to the eyewitness accounts. This public debate and the administration's promise to investigate and mete out justice are the only redeeming aspects of the tragedy, in the view of foreign public opinion, the survey showed.

Aldo Rizzo, an editorialist in the Bologna daily Il Resto del Carlino, condemned the alleged massacre and added:

"All this must be said explicitly and without mental reservation, but it is necessary to add that the war crime of Song My is being examined, weighed and discussed in America today with a frankness and sincerity that has no precedent in the sad history of such things."

**U.S. Press Lauded**

La Stampa, the respected Turin daily, wrote in a front-page editorial: "But the civilization of a people is judged above all by the courage and the severity with which it isolates certain individuals and denounces their crimes. The American press has done and is doing its duty."

Government officials in most countries have refrained from making statements. Among the exceptions were those in Britain, Sweden, Norway and West Germany.

Prime Minister Harold Wilson, six days before the White House issued its statement, said that it would be a grave atrocity if the charges made thus far turned out to be only a quarter true.

Efforts are under way to bring the issue into the House of Commons for formal debate or at least before a meeting of the parliamentary Labor party before Mr. Wilson's departure for Washington in January.

The British press, politicians and people were quicker than their American counterparts to sense the full horror of the affair, a correspondent wrote from London, adding:

"Why should this be so? Perhaps it is easier for outsiders to see horror. The British admire us so much, and still have so many illusions about the United States, that our wounds make them bleed. And they are less inured to violence than Americans now."

**Silence Rejected**

Foreign Minister Torsten Nilsson of Sweden said in a speech in Malmo last week: "World opinion cannot be silent about the American war crimes in Vietnam. We must say clearly what we think."

In Norway, My Lai was described during a debate in the Storting (parliament) as a horrifying example of the atrocities of war. It was the main reason why Gunnar Garbo and Olaf Kortner, respectively chairman and vice-chairman of the Liberal party, which is part of the government coalition, came out for recognition of Hanoi.

Guttorn Hansen, the spokesman for the Labor opposition, which is spearheading the move for recognition, said: "This war is a heavy weight on America's relations with its friends around the world, and from the dead-end street this great nation has driven itself into, there is only one way out."

In Bonn, Chancellor Willy Brandt was asked about My Lai at his first news conference since taking over the government and refused to draw a parallel with Nazi war crimes. He replied:

"If I were still a private citizen or a newspaperman I know what I would say. I can see how heavily the burden weighs on the American people and I feel it inappropriate for me to comment as if to put two things in the same pot that do not belong together."

Associated Press

LESSER CHARGES—Charles Manson (left), head of the hippie cult allegedly linked to the Sharon Tate murders, sits in an Independence, Calif., court with his lawyer, Fred Schaefer. Mr. Manson was bound to a superior court on charges of auto theft.

## *Murder Charge Set for Manson*

LOS ANGELES, Dec. 4 (AP).—A prosecutor said he will seek murder and conspiracy indictments against at least six persons in the killing of Sharon Tate and others, and that Charles H. Manson will be the *object of one conspiracy count.*

This was the first word that Mr. Manson, leader of a band of roving hippies, some of whom are accused of the slayings, would be the target of prosecution in the case.

## Sharon Tate's Father Played Hippie to Track Her Killers

PALOS VERDES, Calif., Dec. 4 (UPI).—The father of slain actress Sharon Tate, a former Army intelligence officer, says he grew a moustache and beard and mingled with drug users for four months while trying to track down his daughter's killers.

Paul J. Tate, 46, said he masqueraded as a hippie, frequented hippie hangouts and lived in communes in his hunt for the persons who carried out the Aug. 9 murders.

"Anything I know about the case will be told at the proper time," Mr. Tate said in declining to say if his efforts were of value in the arrests of three suspects.

In Independence, Calif., Charles Manson, the fierce-eyed leader of a cult suspected of killing Miss Tate and almost a dozen other persons, was taken to court in chains yesterday on a relatively minor auto theft charge. He was held in lieu of $25,000 bail.

The district attorney's office said Mr. Manson would be released to Los Angeles authorities when a murder warrant was issued.

Mr. Tate was concerned with the recent revelations about details of the crime. "You don't go around telling the world what information or evidence you have," he said. "You never know for sure whether you have an airtight case."

He said the implication of a cult known as "the Manson family" in the murders of his daughter and six other persons had "taken a great weight off my mind." However, he expressed bitterness about reports in the "sensational press" over the background of his daughter.

Mr. Tate recently retired as a lieutenant colonel in Army intelligence after 23 years.

Mr. Tate said he worked alone and with Southern California authorities on his investigation. Before Mr. Tate confirmed he conducted his own investigation, Los Angeles police detectives and narcotics officers said he had no connection with their investigation of the case.

Mr. Manson, who held a Rasputin-like sway over his followers, was one of nine persons arrested in a police raid of the hippie commune's hideout at the edge of Death Valley.

After a six-hour preliminary hearing in Independence, the court ruled there was sufficient evidence of receiving stolen property to bring Mr. Manson to trial. Bail was set at $25,000 and the district attorney said he would file a formal charge by Dec. 12.

The Los Angeles grand jury will begin to hear evidence in the Tate murders tomorrow and indictments were expected to be issued next week.

So far, three suspects have been formally charged with the Tate slayings and at least five other suspects were reported in custody but not charged.

Attorneys for Patricia Kernwinkel, 22, charged in California with the murder of Miss Tate and four others, filed a motion in Mobile, Ala., yesterday challenging the legality of her arrest here.

Meanwhile, Linda Louise Kasabian, 20, one of the three persons facing the murder charges, was returned to Los Angeles last night from Concord, N.H.

The third person charged in the murders so far is Charles Watson, 24.

At the same time, Los Angeles country sheriff's deputies said they were investigating for any links between the Tate and Labianca slayings and the killing of Marina Elizabeth Habe, 17, daughter of writer Hans Habe, last January.

Miss Habe, stabbed repeatedly in the chest and beaten about the face after a family friend dropped her off at her driveway following a date, was found at the bottom of a thickly wooded ravine off a lovers lane in the Hollywood hills.

**More Killings Were Planned**

LOS ANGELES, Dec. 4 (Reuters).—Eighteen persons died in a string of ritual killings carried out by the hippie gang linked with the murder of Sharon Tate, a lawyer for the woman who helped police break the case said here.

"The more they stabbed, the better they felt," attorney Wesley Russell told reporters. "Some of the murder victims are buried in the desert and their bodies probably will never be found." He also claimed the gang planned to carry out another 11 killings.

Mr. Russell made his disclosures yesterday after his client, Shelley Nadell, 31, was remanded in custody for a further two weeks on a drug prescription forgery charge.

## Senate May Rush 15% Rise In Social Security Benefits

WASHINGTON, Dec. 4 (UPI).—The Senate was offered an opportunity today to rush a 15-percent increase in social security benefits into law before the end of the year. It seemed likely to seize it.

In an unexpected move, Sen. Russell B. Long, D., La., chairman of the Senate Finance Committee, proposed that the Senate tack the social security benefit rise onto its tax reform bill, which is expected to be approved by the Senate before the year ends.

The amendment offered by Sen. Long was comparable to a bill approved yesterday by the House Ways and Means Committee. The House is expected to vote on that bill soon, possibly next week.

It provides for a simple 15-percent across-the-board increase in benefits. Other matters, such as financing the increase and dealing with President Nixon's proposal for automatic cost-of-living increases, would be handled separately in legislation to be considered next year.

The action by the House committee—and Sen. Long's proposed action by the Senate—represented a rebuff to Mr. Nixon, who had proposed only a ten-percent increase in social security benefits to become effective next March.

But Sen. Long told the Senate that he had "no doubt in my mind" that the House bill would become law before January if the Senate were given a chance to vote on it.

His approach was unusual. Normally, extensive hearings would be held by Sen. Long's committee on such a far-reaching matter before it came up for floor consideration in the Senate.

"We are not likely to have time to conduct hearings," Sen. Long said. He said that the Senate would be given an opportunity to vote on the social security amendment to the tax bill in a few days.

Sen. Winston L. Prouty, R., Vt., said that he wanted to offer a competing amendment. It provided for a six-month ten-percent increase in social security benefits while Congress took time to study "permanent and comprehensive benefit increases."

The Prouty proposal would raise the present minimum monthly benefit of $55 to $90 and increase all benefits which are now at $82.30 or more by ten percent.

**Nixon Concerned**

WASHINGTON, Dec. 4 (Reuters).—President Nixon told congressional leaders today that he was very concerned over the Senate vote raising the personal tax exemption but made no definite comment on the possibility of vetoing the tax reform bill, House Republican Leader Gerald Ford of Michigan told a news conference.

## *Congress Gets Nixon Threat of Dec. 26 Call*

WASHINGTON, Dec. 4 (UPI).—President Nixon threatened today to summon Congress back to work the day after Christmas if lawmakers adjourn for the holidays without acting on all appropriations bills.

The hint of a special working session was related by House Republican leader Gerald R. Ford and Senate leader Hugh D. Scott, who said the President served "firm" notice he would bring Congress back Dec. 26 if the House and Senate fail to act "on all appropriations bills."

The Senate leader said Mr. Nixon might agree to a New Year's Day holiday. Otherwise, he said, the President was "flat and categorical" in his determination to keep Congress working until the vital money bills were passed.

Failure of the Democratic-controlled Congress to act on them has left many government agencies operating on a temporary spending basis since the current fiscal year began July 1.

Only seven appropriations bills have cleared Congress this year. The Republican leaders and the President objected that lack of action on the bills was interfering with preparations of a budget for fiscal 1971. The new budget customarily is sent to Congress in late January.

## *Union Officials, Railmen Reach Contract Accord*

WASHINGTON, Dec. 4 (UPI).—Railroad and labor negotiators, averting a threatened nationwide rail strike, agreed today on a new contract that increases top pay for four shopcraft unions from $3.60 to $4.28 per hour by next August.

The tentative agreement for 1969 and 1970 must still be ratified by the 46,000 members of the machinists, sheetmetal workers, electrical workers and boilermakers-blacksmiths whose unions are affected by the pact.

But William W. Winpisinger, vice-president of the machinists and chief negotiator for the four unions, said he expected members to vote quick approval. And Labor Secretary George P. Shultz assured reporters "there will be no strike."

The unions had been free to strike at 12:01 a.m. Wednesday, but agreed to stay on the job as long as progress was reported in the talks. Had negotiations failed, a strike would have been certain with the possibility of a virtual shutdown of the nation's rail service.

Officials would not reveal other details of the proposed contract.

## Rockefellers Were Lindsay's Biggest Donors

ALBANY, N.Y., Dec. 4 (UPI).—The largest contributor to Mayor John V. Lindsay's $3 million reelection campaign was the Rockefeller family.

Reports filed with the New York secretary of state's office yesterday showed the Rockefellers contributed a total of $70,000 to Mr. Lindsay's bid for a second term as mayor of New York. The reports were a nearly complete accounting of the campaign receipts and expenses in the mayoral race.

The Rockefeller money did not come from the New York governor, but from his family. The $70,000 does not include $2,000 contributed by the governor's first wife, Mary C. Rockefeller, or the $14,000 which the governor gave Mr. Lindsay prior to his defeat in the Republican primary.

## *U.S. Advised To Finance All Relief*

### Commission Issues Report After Study

WASHINGTON, Dec. 4 (NYT).—The federal government should assume "full financial responsibility" for all public assistance programs, including Medicaid, the Advisory Commission on Intergovernmental Relations urged Tuesday.

The commission, in a report prepared in April but not released until this week, also called upon state governments to relieve their local units of "substantially all fiscal responsibility" for education. The commission said school costs were eating deeply into limited local tax resources, pushing more prosaic duties such as refuse collection and law enforcement "to the fiscal wall."

The 26-member commission was established by Congress in 1959 to offer advice on the "most desirable allocation of government functions." Its bipartisan membership includes administration officials, members of Congress, governors, state legislators, mayors, county executives and private citizens.

The recommendation of federal assumption of welfare costs goes beyond President Nixon's plan to set federal standards for public assistance and to assume a larger share, but not all, of the welfare burden.

No mention of Mr. Nixon's proposal was made in the 105-page advisory commission report. The commission did not offer a detailed plan for welfare reform. In essence, its major recommendation said that no matter what welfare system is in effect, the national government should pay the bill.

Based on 1967 cost data, the combined effect of the two recommendations—federal financing of welfare costs and state financing of nearly all local school costs—would be to provide some $13 billion in budget relief to local governments across the country and increase the fiscal requirements of the states by about $9 billion, the report said.

The federal government would have to pick up the difference in its welfare funding, which the report listed as $4 billion in one section and $4.6 billion in another. The figures did not take into account any changes in the welfare system, such as Mr. Nixon has proposed, which would also add to the federal cost.

William G. Colman, executive director of the commission, was asked at a news conference why the report did not mention Mr. Nixon's proposal. He said the proposal, submitted in August, had not been formulated when the commission voted on its recommendations April 13.

Asked to explain the seven-month delay in publication of the commission's report, Mr. Colman said the commission members were "victims of an incredibly slow printing process in the federal government."

All three Nixon administration members of the commission abstained from voting on the welfare recommendation. The report said these members, Robert H. Finch, Secretary of Health, Education and Welfare; George Romney, Secretary of Housing and Urban Development, and Robert P. Mayo, director of the Budget Bureau, had had "insufficient opportunity to review and analyze its implications."

**Quebec Fire Killed 38**

NOTRE-DAME-DU-LAC, Que., Dec. 4 (Reuters).—Officials yesterday said 38 people died in a fire that swept through a home for the aged here Tuesday. Earlier reports had placed the death toll at 50. Twenty-nine persons survived the fire.

# Nixon Announces Haynsworth Will Remain on Circuit Court

By Carroll Kilpatrick

WASHINGTON, Dec. 4 (WP).—President Nixon announced today that Judge Clement F. Haynsworth, despite "the brutally vicious" attack on him, would remain as the chief judge of the Fourth U.S. Circuit Court of Appeals.

Mr. Nixon made the announcement and the attack on Judge Haynsworth's opponents in person with the judge standing by his side at the White House.

After a bitter debate, the Senate Nov. 21 rejected by a 55-to-45 vote the President's nomination of Judge Haynsworth as an associate justice of the Supreme Court. He was the first nominee to the high court formally rejected since 1930, when Judge John J. Parker was defeated 41 to 39.

The President called Judge Haynsworth today a man of "courage" and "integrity" and said that he is needed on the circuit court.

"I must say that after the brutally vicious, and in my opinion unfair, attack on his integrity, I could well understand why the judge would retire to private life," Mr. Nixon said.

"A weak man would, a fearful man would. The judge is not a weak man. He is a strong man.

"I told him of my philosophy, which is that a great philosophy is one that is never without defeat, but it is always without fear. The judge has suffered a defeat, but he is without fear."

Mr. Nixon said he had corresponded with Judge Haynsworth since the Senate vote and had urged him to remain on the bench. The judge asked for time to think it over and consider whether the attacks on him "had impaired his ability to serve," the President said.

"I am delighted to announce today that the judge will continue to serve."

The meeting between the two men, which took place just before they appeared in the Roosevelt Room before newsmen, was their first.

After the President spoke, Judge Haynsworth said that "no one likes to lose. I don't. But I never have felt that a setback should be accepted as a final defeat of a man as a judge."

He said he had been "greatly encouraged" by thousands of letters from all parts of the country from "big people and little people, lawyers . . . schoolteachers, labor union people, all sorts of folks."

He said he had become convinced that his associates on the Fourth Circuit Court and members of the bar wanted him to remain. "So I am going to stay on," he said.

The judge thanked the President for his trust and support, which he said had been "constant, unflagging."

"It has been a great source of pride to me and I will take that pride with me as long as I live," he said.

With that, the two men left the room.

## Ex-Sen. Brewster Is Reported Ill In Irish Hospital

WASHINGTON, Dec. 4 (WP).—Former Sen. Daniel B. Brewster, D., Md., who is scheduled to be arraigned in Washington Dec. 12 on federal bribery charges, is in an Irish hospital undergoing treatment for an unidentified illness, his wife said yesterday.

"My husband is a patient in a neurosurgical unit of an Irish hospital," Anne Brewster told reporters who reached her by telephone at her farm in Naas, Ireland, near Dublin.

"He is seriously ill, but he is most anxious to return to America to answer and refute the charges that have been brought against him, and will do so as soon as he is well enough."

Mrs. Brewster would not give the name of the hospital where her husband is a patient, or the nature of his illness.

A federal grand jury indicted Mr. Brewster, the Spiegel Inc. Chicago mail-order house and Spiegel's Washington lobbyist, Cyrus T. Anderson, on Monday after a six-month investigation.

Mr. Brewster was charged with receiving payments totaling $24,500 from Mr. Anderson and Spiegel to influence his vote on "junk mail" legislation.

*In Prisoners' Protest Since July*

# Self-Mutilation Toll Put at 300 in Kansas

By John Kifner

LANSING, Kan., Dec. 4 (NYT).—Fourteen protesting prisoners slashed their arms and legs behind the grim old yellowstone walls of the Kansas State Penitentiary last night, bringing the number of self-mutilations here to 300 since July 1.

The bloody protests are part of a desperate struggle between the inmates and the new state penal director, a struggle that began with a riot and has its roots in years of public neglect of the prison system.

The Kansas penitentiary, like most prisons, has virtually been run by the men confined behind its walls.

The prisoners draw their strength from the weakness of the prison system and from tightly organized rackets run by the toughest and strongest convicts—"the inmate power structure"—which are often enforced by terror, murder and gang rape.

The new prison director, Robert N. Woodson, the former head of the State Highway Patrol, is determined to break up the power of the inmates and to take a tough line in running the prison. A number of the prisoners are determined that he will not.

The trouble began at Lansing on the evening of June 17 with a "shakedown" search ordered by the former penal director, Charles McAtee.

The search of the cells turned up a vanload of weapons—knives, clubs and a loaded pistol—and quantities of drugs as well as miscellaneous "nuisance contraband," such as unauthorized furniture and excess magazines.

The riot began with the 8 a.m. work-call whistle the next morning.

The inmates stormed out of their cells, throwing things. The guards were pulled out and the convicts held the three cell blocks for a week and a half. They ripped out the master locking system and roamed inside the cell blocks, held in check only by occasional tear gas and rifle fire from the control towers.

Shotgun-carrying highway patrolmen finally herded them into a temporary compound, where they promptly burned down three trailers set up for temporary housing.

**Cut Achilles Tendons**

Mr. Woodson, a Democrat, succeeded Mr. McAtee, a Republican, on July 1, and immediately began attempts to tighten up the security of the prison. He instituted, for instance, a pass system so that prisoners could no longer wander about the yard.

The prisoners have responded by "going underground" with the wave of self-mutilations—some of which have involved cutting the achilles tendon—and arson and escapes.

There have been 15 recent cases of arson, Mr. Woodson said, including a fire that burned out the roof of one of the shops, causing $75,000 in damage.

Mr. Woodson will not allow reporters to talk to any of the prisoners, but their goals are said to be the ousting of the new director and the prompting of a federal investigation of prison conditions. Mr. Woodson's permanent appointment must be confirmed by the legislature in January, and there is said to be strong Republican opposition.

**Built After Civil War**

The Kansas State Penitentiary is an 11-acre compound, most of which was built just after the Civil War. Inside the walls there is an honor dormitory, which has no doors on the cells, some of the prison shops, which make soap, paint and license plates for the state, and the three main cell blocks.

Arranged on tiers within the cell blocks are the rows of 5-foot-by-12-foot cells, many of them decorated with such attempts at individuality as greeting cards, weight-lifting trophies and homemade cardboard lamps with revolving shades.

In the center of the compound there is a massive, windowless gray concrete structure known to the officials as the "Adjustment and Treatment Center" and to the convicts as "The Hole".

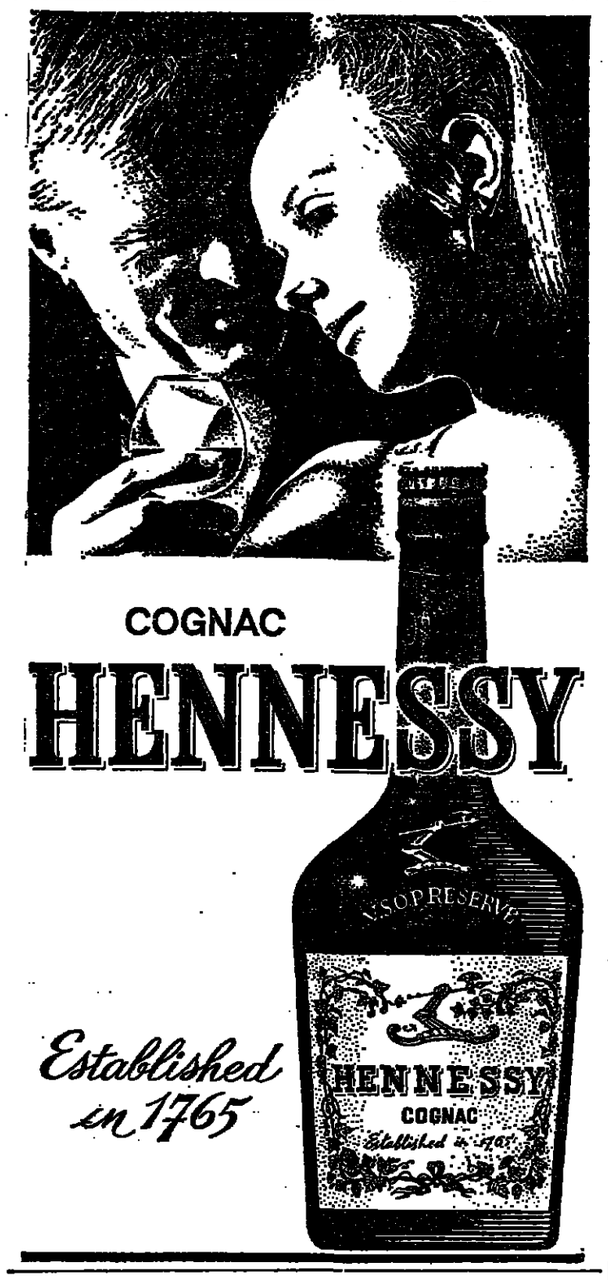

When the steel bars of the electrically controlled sliding doors bang shut and a man puts on the baggy blue convict dungarees, he enters a tough, vicious world with its own law, a world that is in some ways a mirror image of the world on the outside.

"The meanest, toughest, cruelest people claw their way to the top of the convict structure," said Dr. Don Hardesty, a psychology professor at Washburn University, who is conducting a study of the problems of the prison guards.

Their means often include terrorism, maiming and even murder. There have been six murders within the walls of the penitentiary in the last 18 months.

Homosexuality is rampant. "Anyone who comes in there weighing less than 160 pounds can expect to be gang-raped by other inmates and turned into a 'catcher,'" said Dr. Hardesty. "A lot of this is for the purpose of subjecting him, cutting the legs out from under him, rather than for sexual purposes. Some have to enter into 'marriage relations' for their own protection."

Both officials and outside observers trace much of the trouble in the penitentiary to the common prison practice of depending upon the cooperation of prisoners to "keep the lid on."

**CITY BATTLE DEATH—Black Panther chieftain Fred Hampton, who was killed yesterday during a gun battle with Chicago police, as he addressed a rally in October. With him is anti-war leader Dr. Benjamin Spock.**

# Illinois Panther Chief Killed In Gun Battle With Police

CHICAGO, Dec. 4 (UPI).—Fred Hampton, the Illinois chairman of the Black Panther party, and another man were killed early today in a gun battle with Cook County police, a police spokesman said.

Four other persons were wounded and three were arrested.

The state attorney's office said 13 of its special prosecution police approached an apartment building near the Black Panther headquarters early today. He said they possessed a "legal warrant, issued by a judge, for illegal weapons."

He said informants had told of seeing sawed-off shotguns and other illegal weapons in the apartment.

The spokesman said the police knocked at the apartment, identified themselves and told occupants they possessed a warrant.

The police entered the apartment and "eight or more individuals began firing with carbines, shotguns and handguns," the spokesman said.

**Two Police Hurt**

A call for assistance brought an additional 50 policemen to the scene with heavier armament, including machine guns and tear gas.

Mr. Hampton and another man identified as Mark Clark were killed, he said, and four persons, including two policemen, were injured.

Police said they found 13 shotguns, eight hand guns and 5,000 rounds of ammunition scattered around the apartment.

**S.F. Panther Arrested**

SAN FRANCISCO, Dec. 4 (UPI).—Black Panther leader David Hilliard was arrested yesterday and charged with threatening the life of President Nixon during an anti-war Moratorium rally Nov. 15.

Mr. Hilliard, 27, was seized here by Secret Service agents. He was immediately arraigned before U.S. District Court Judge Stanley Weigel, who set bail at $30,000.

At the Moratorium Day rally in Golden Gate Park Mr. Hilliard told an audience of 100,000: "We will kill Richard Nixon."

The arrest was made on a federal grand jury indictment charging the Panther leader with "willfully and knowingly" making a public threat on the President.

# Church Council Elects Woman

DETROIT, Dec. 4 (UPI).—Dr. Cynthia Wedel, an outspoken advocate of women's rights, today was elected the first woman president of the National Council of Churches.

Mrs. Wedel, a 61-year-old Episcopalian from Washington, D.C., defeated the Rev. Albert B. Cleage jr., a Detroit Negro pastor, in secret balloting at the NCC's triennial general assembly. She will serve a three-year term in the highest office of the nation's largest cooperative religious body.

The assembly re-elected Dr. R. H. Edwin Espy to the top administrative post of general secretary

# British Isolate Jaundice Virus

LONDON, Dec. 4 (AP).—British scientists have scored a major advance in combating infectious jaundice by isolating a virus that causes the liver disease, the London School of Hygiene announced yesterday.

But Dr. Arie Zuckerman, head of the school's bacteriology and immunology department, said: "We still have a long way to go."

Isolating the virus means that research workers can experiment directly with the disease agent and look for a vaccine against it.

AP.

# 'New Africa' President Quits Over Doctrine

DETROIT, Dec. 4 (UPI).—Robert P. Williams, who helped lay the groundwork for the Black Power movement, has resigned as the president of "The Republic of New Africa," because of its separatist philosophy.

"My immediate aims now are to concentrate on the immediate problems in America," Mr. Williams, 45, announced a week after his resignation.

"We do not hate America because it is American or because it is white," Mr. Williams said. "We hate America because it is wrong."

# *UN Dispute Over Syria's N.Y. Mission*

## Charge of a Sit-In Is Denied by U.S.

By Robert H. Estabrook

UNITED NATIONS, N.Y. (WP), Dec. 4.— The Soviet Union, Algeria and Hungary complained in the Security Council this afternoon about a forcible occupation of the Syrian mission yesterday which American officials contend did not happen.

The complaints coincided with a march this afternoon on the Third Avenue office building where Syria maintains its United Nations mission by about 1,100 American college students of Jewish origin. They were protesting Syrian detention of two Israelis who were passengers aboard a TWA jetliner hijacked to Damascus.

Demonstrators were orderly and offered no challenge to New York police.

Syrian Ambassador George Tomeh had protested yesterday that a group of 40 had occupied his 25th-floor office in violation of international law.

**Dispersed Peaceably**

Officials of the U.S. mission said, however, that five persons who had asked to see Mr. Tomeh left his office when they found he was not there, and that the larger group dispersed peaceably when asked by police.

Despite reassurance by U.S. Ambassador Charles Yost that all necessary precautions were taken, Soviet Ambassador Jacob Malik demanded "immediate measures" because UN missions "do not feel secure and safe in New York."

Quoting 19th-century Russian writer Pushkin that "it is impossible to keep silent," Mr. Malik reminded the United States of its obligatons as the host country to the UN. "To be the butt of hostile thought of local organizations or movements is absolutely unacceptable," he declared.

Algerian representative Mohammed Yazid and Hungarian Ambassador Karoly Csatorday made similar reproaches.

# Saudis, Yemenis Battle as Kuwait Tries Mediation

ADEN, South Yemen, Dec. 4 (UPI).—South Yemeni and Saudi Arabian troops today fought for control of a disputed desert outpost in a 24-hour battle supported by jet planes and helicopters, military bulletins said.

Meanwhile, official sources in Kuwait reported that Kuwait and Morocco had set in motion attempts to mediate the eight-day-old Saudi-South Yemeni crisis before it spoils chances for Arab unity against Israel at the Arab summit conference later this month.

South Yemeni forces reportedly killed or wounded 50 Saudis and captured 13 during the battle. The Yemeni report said three of its troops were killed in the fighting that was continuing today.

A Saudi report from Jeddah said the Saudi Royal Air Force raided the South Yemeni positions three times yesterday, destroying 21 trucks, an armored car, a fuel tank and three gun batteries.

# Israeli Soldiers Kill 2 Guerrillas

TEL AVIV, Dec. 4 (UPI).—Israeli troops today killed two Arab guerrillas and captured another in occupied Gaza, an Israeli Army spokesman announced.

He earlier reported that Israeli troops had killed an Arab bystander and injured two others when they fired on an Arab guerrilla who had thrown a grenade at them in the heart of Gaza. The attacker escaped unhurt, the spokesman added.

The Gaza attacks were the only major incidents reported today except for one Israeli air strike against Egyptian military installations in the southern sector of the Suez Canal.

# 100,000 Metalworkers Stage Silent March Through Milan

MILAN, Dec. 4 (UPI).—An estimated 100,000 metalworkers staged a "march of silence" through Milan streets today that went off without incident.

Traffic in Milan, Italy's second largest city, was tied up for hours by the march. Snow and then sleet pelted down on the workers, but they ignored the weather.

The workers marched to dramatize their demand for higher pay and a 40-hour week and to urge the release of four workers arrested on Nov. 6 when demonstrators attacked the Fiat Automobile Co. offices in Milan.

They carried banners, but they followed union orders to keep it a "march of silence" and did not shout or sing.

However, several thousand left-wing students who joined them sang the Communist anthem, "The Internationale," and shouted such slogans against the government as: "They exploit us, they kill us, they send us to jail and they call this liberty."

It was the second large demonstration organized by metalworkers' unions in one week. Nearly 60,000 marched in Rome last Friday.

While the Milan march was under way, union and management officials met in Rome with Labor Minister Carlo Donat-Cattin to try to resolve their differences. The nation's 1.3 million metalworkers have been striking sporadically for nearly three months.

Italian municipal employees, including garbage collectors and, in Rome, some policemen, were in the second day of a strike.

An anesthetists' strike forced hospitals to postpone all but emergency operations. Some doctors also went on strike today; other walkouts closed banks and treasury offices.

At Turin, police said that two young men tried to burn down an office of the extreme left-wing Proletarian Socialist party before dawn today.

The management of Milan's La Scala Opera said tonight that the season would open as scheduled Sunday.

Labor leaders in several plants have said that they plan to picket La Scala to protest what they called "a display of luxury and ostentatious wealth."

The La Scala management met for three hours with Mayor Aldo Aniasi and decided to go ahead with the season opening. But it made a gesture to the protesters by announcing that it would be downgraded from a gala to an ordinary performance.

# Ruth White Dies at 55; U.S. Actress

PERTH AMBOY, N.J., Dec. 4 (AP).—Ruth White, 55, character actress of stage, screen and television, died in Perth Amboy General Hospital yesterday after an illness of several months.

In 1964, Miss White won the Emmy award as best supporting actress for her role as the mother of an Irish girl in the television play "Little Moon of Alban."

She had appeared in supporting roles with such stars of stage and screen as Charles Boyer, Jason Robards jr. and Julie Harris.

In 1967, she received an award given by the New York Chapter of the National Academy of Television Arts and Sciences for her role as Mrs. Ruggles in "The Club Bedroom" on television.

A native of Perth Amboy and a life-long resident of the community, she was educated at local schools and Douglass College of Rutgers University, where she earned a masters degree.

**Lord Carron**

LONDON, Dec. 4 (AP).—Lord Carron, 67, former president of Britain's second-largest union, the Amalgamated Engineering Union, and a director of the Bank of England, died suddenly at his London home last night.

**Donald McMillan**

NEW YORK, Dec. 4 (UPI).—Commissioner Donald McMillan, 82, who supervised the Salvation Army's post-World War I relief programs in England and France and later served as national commander of the organization here, died yesterday after a long illness.

**Mark Schweid**

NEW YORK, Dec. 4 (NYT).—Mark Schweid, 78, a star of the Yiddish and English theaters in New York during the '20s and '30s, died Tuesday at the Workmen's Circle Nursing Home in the Bronx. He suffered from Parkinson's disease.

# Marcantoni Free On Bail in Actor's Bodyguard Death

PARIS, Dec. 4 (Reuters).—François Marcantoni, the only man charged in connection with the 14-month-old murder of acter Alain Delon's former bodyguard, was released on bail today and immediately sentenced to four months imprisonment in another case.

Marcantoni, 52, had been in jail since last January, charged with complicity in the murder of Stefan Markovic. An appeals court ordered his release yesterday and Marcantoni walked out of a Versailles prison today after his lawyers paid 60,000 francs ($10,900) bail.

Half an hour later, a court in nearby Corbeil sentenced Marcantoni to four months imprisonment on fraud charges. He was found guilty of making out a false certificate for himself in order to obtain a loan.

Marcantoni was represented by his lawyer at the Corbeil court and is allowed to appeal his sentence.

# Hijack Treaty Agreed On

LONDON, Dec. 4 (UPI).—Britain and the United States have agreed in principle to negotiate a new extradition treaty to cover plane hijackers, a Foreign Office spokesman said today.

# American Hospital of Paris Adds Intensive Care Unit

By Mary Blume

PARIS, Dec. 4.—The American Hospital of Paris has announced the opening this month of its latest installation, a $200,000 intensive-care unit. According to executive governor Hugh S. Fullerton, the American Hospital is the only private hospital in France to offer such a unit.

Defined as a specially designed area where the sickest patients, the most highly trained nurses and the most advanced electronic equipment are grouped, the intensive-care unit is primarily for cardiac cases, although it will also take in other critically ill patients.

Headed by Dr. Thomas F. Hewes of the hospital staff, the unit will have seven beds, seven specially trained nurses and three resident doctors on duty all the time.

Highly advanced electronic equipment imported from the United States enables the staff to keep a constant and thorough check on each patient's condition and to act with utmost speed in case of an emergency.

In addition to the intensive care unit, the American Hospital has extended its X-ray department so that it is now equipped for the most advanced diagnostic radiology.

Additions made at a cost of over $600,000 include a radio-cinematography machine for vascular X-rays and a tomograph for diagnostic chest X-rays.

The new installations continue the hospital's pioneering efforts. It had the first oxygen tent in Europe and the first iron lung in France and was also the first hospital in the country to start cobalt therapy.

At the present time, its diagnostic radioactive isotope apparatus is duplicated by only a few of France's largest hospitals. A majority of patients in the heavily crowded isotope laboratory are French, sent there by French hospitals.

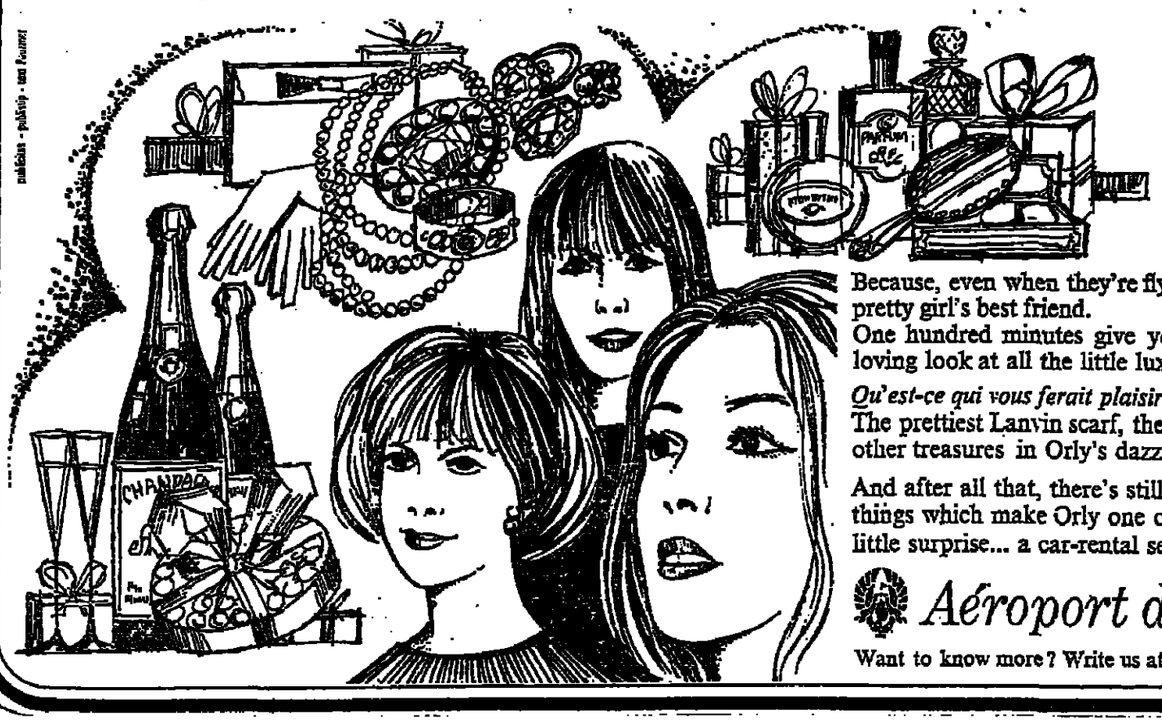

Consulting physicians and well over half the patients occupying the hospital's 180 beds are French, with former patients ranging from Pablo Picasso to Gen. de Gaulle's brother, Pierre. The hospital is supported by private donors, almost all of them American. Some 80 doctors are American, and the board of governors is made up of distinguished members of the American community. The hospital's chef is French.

Founded in 1910, the American Hospital of Paris served with distinction during World Wars I and II and, for so modern an institution, has deep roots in French history. Louis XV had a summer home on the hospital's Neuilly site, and Bismarck's soldiers camped there after the siege of 18[illegible]

**OLD GUARD**—The leaders of the Soviet Union's ruling hierarchy paying a last tribute to Marshal Kliment Y. Voroshilov as he lay in state in a Moscow hall. From left: party theoretician Mikhail A. Suslov, Premier Alexei N. Kosygin, President Nikolai V. Podgorny and Leonid I. Brezhnev, chairman of the Communist party.

## U.S. Approves 10,000 Rifles For Brazil

### Congress Expected to Criticize Decision

By Tad Szulc

WASHINGTON, Dec. 4 (NYT).—The State Department has granted an export license for 10,000 M-16 rifles for the Brazilian Air Force—the largest commercial authorization for this type of weapon so far for a foreign country—but Brazil now seems uncertain whether it wants them.

State Department officials said the license was approved on Sept. 18 by the Office of Munitions Control, with the concurrence of the Pentagon and of the State Department's Bureau of Inter-American Affairs, almost three years after Brazil requested it.

The decision is almost sure to set off new criticism in Congress, many of whose members oppose the supply or sale of U.S. arms to Latin America and notably to military regimes such as Brazil's.

State Department officials said that the three-year delay in authorizing the $1.5 million transaction was due to the earmarking of the entire M-16 production for the Vietnam war and other requirements of the U.S. armed forces and its allies.

**Shortages Eased**

They said these shortages have now been alleviated, thus making possible the consideration of commercial sales abroad.

But industry sources said the production capacity could have been adequately increased several years ago if the Defense Department had not asked Colt Industries, Inc., the principal manufacturer, and General Motors Co., to keep the output down.

This year, however, the alleged restrictions were lifted and the two companies now turn out a total of 60,000 M-16s monthly.

But a spokesman for Colt Industries, which applied for the license on Brazil's behalf in 1966, said yesterday that no actual purchase order has thus far been received from Brazilian authorities.

In a report to President Nixon, issued last month, Gov. Nelson Rockefeller recommended that the United States establish a program of commercial sales of all modern weapons, including aircraft, to Latin America. He said that arms and ancillary equipment were needed for internal security in the context of what he saw as the danger of widespread subversion in the hemisphere.

The governor also said that if the United States did not make the arms available, the Latin Americans would turn to other sources of supply.

## *France Seeks Blood-Alcohol Test for Drivers*

PARIS, Dec. 4 (AP).—Shocked by new figures on alcohol consumption, the French government has decided to define drunken driving as a blood-alcohol content of .80 grams per thousand.

Under present law, it was up to the individual policeman or judge to decide on whether a driver was "under the influence" or "in a state of drunkenness."

The proposal, announced yesterday, uses the blood-alcohol figure recommended two years ago at an international meeting of transportation ministers in Hamburg and recently seconded by the French Academy of Medicine.

The pro-government majority in the National Assembly assures passage of the bill, but the wine lobby is expected to try for at least a higher blood-alcohol content.

As it is, the .80 grams per thousand is figured as about two-thirds of a bottle of cheap wine for a man and half a bottle for a woman. Doctors estimate that five million, or nearly 15 percent, of the adults in the country are either alcoholics or excessive drinkers.

France is the heaviest-drinking country in the world, with 28 liters of pure alcohol—equivalent to 280 liters of cheap wine—per year per adult, 40 percent more than second-place Italy, double that Germany, and triple that of Britain and the United States.

A lot of these drinkers drive. One report says alcohol is at the bottom of one-third of all accidents.

Another survey, by a hospital, found that after fatal auto accidents, 40 percent of the drivers had been drinking, and the blood-alcohol content was up to or over the drunkenness level in 23 percent of the cases.

Wine is the mass consumption drink in France, according to the figures, but it is not the choice vintages. The choice vintages account for almost a negligible part of total production, let alone consumption.

It is rather the cheap wines, 10 percent alcohol content or more, which sell for less than the cheapest soft drinks. One source says that 70 percent of all French wine goes under the belts of individuals who neither need it nor are in a state to appreciate it.

Aside from drunken driving, the cost to France of alcohol is enormous. First, the French spend more on it—17.47 billion francs [$3.5 billion] in 1965—than they do on rent.

Second, they fill up the hospitals, not only for alcoholism but also for psychiatric troubles and aggravated cases of almost every other disease. Alcoholism alone soaks up 42 percent of the budgets of all the Paris hospitals.

Overall, the cost of alcoholism to the French taxpayer has been estimated at anywhere from 2.5 billion francs [$450 million] to 8.5 billion francs [$1.53 billion].

The government has reportedly also considered an "increased risk surcharge" or tax on alcoholic beverages to pay the burden.

## Wife of Liu Reported Slain In Maoist Plot

HONG KONG, Dec. 4 (UPI).—The wife of Communist China's ousted President Liu Shao-chi was slain as a spy in August in a plot masterminded by the wife of Communist party chairman Mao Tse-tung, the newspaper Sing Tao Jih Pao reported yesterday.

The right-wing newspaper quoted a Chinese traveler from the mainland as saying that Mr. Liu himself is being forced to work "under strict supervision" in a steel factory in Manchuria.

He was chief of state from 1959 till he was deposed last year.

The newspaper said the traveler claimed to have seen documents while he was in his home province of Szechuan reporting the death of Wong Kwang-mei, Mr. Liu's wife.

## Franco Celebrates His 77th Birthday

MADRID, Dec. 4 (Reuters).—Gen. Francisco Franco had a quiet family celebration at his Pardo Palace residence in the countryside outside Madrid on his 77th birthday today.

Gen. Franco keeps a full round of audiences and other engagements, and has invited President Americo Rodrigues Thomaz of Portugal to go hunting with him this weekend.

## *Adultery, Open Concubinage No Longer Prohibited in Italy*

ROME, Dec. 4 (UPI).—Italy's highest court ruled today that it is no crime for a wife to commit adultery or for a husband to openly keep a mistress.

The ruling of the Constitutional Court overturned a Fascist era penal code which held that wives could be convicted of adultery but a husband could not unless he lived in open concubinage with a woman.

The court said that the law was written at a time when women did not want equality with men.

"It is not up to the court to modify law based on social changes," it said. "But it is indisputable that the court has the right to assure equality among all citizens, regardless of sex or other considerations."

Twelve months ago, the court annulled a section of the law which provided that a wife could be imprisoned for one year for adultery. But it did not mention male adultery.

Lawyers contended that the court did not go far enough, since wives could still be imprisoned for up to two years for maintaining a long-term adulterous relationship while men could not.

The court agreed with the lawyers in its ruling today. At the same time, it struck down a law under which husbands could be jailed for two years for keeping a mistress, saying that the law could not discriminate against husbands now that discriminatory laws against wives have been thrown out.

The ruling means that criminal charges against several women accused of adultery will be dropped.

## *U.S. Envoy Talks To Red Chinese*

WASHINGTON, Dec. 4 (UPI).—The U.S. Ambassador to Poland, Walter J. Stoessel jr., talked briefly with Communist Chinese officials last night, a State Department spokesman said today.

There was immediate speculation that the long-postponed American-Chinese ambassadorial-level talks might be resumed soon. Department spokesman John F. King said that the brief discussion took place at a Yugoslav Embassy reception in Warsaw.

Mr. King did not disclose what the ambassador discussed with the Chinese. But the Nixon administration has said that it wanted to improve relations with Peking.

## Muscovites Pay Last Respects To Voroshilov

MOSCOW, Dec. 4 (Reuters).—Soviet leaders today formed an honor guard at the open, red-draped coffin of former President Kliment Voroshilov, fondly known to Russians as "Klim."

Thousands of people lined up in subzero temperatures to pay their last respects to the 80-year-old marshal, some weeping as they shuffled past the body, lying in state in the ornate Central House of Trade Unions close to Red Square.

Marshal Voroshilov, titular head of the Soviet state from Stalin's death in 1953 until 1960, died on Tuesday night of a heart attack.

He is to be honored with a state funeral on Saturday, when he will be buried by the Kremlin wall, near the remains of Stalin.

## *'Buck White' Kayoed, To Close Tomorrow*

NEW YORK, Dec. 4 (AP).—"Buck White," the musical featuring former heavyweight champion Cassius Clay, also known as Muhammad Ali, will close Saturday night after six performances, the show's management announced today.

The presentation won few favorable reviews and will sustain a loss of about $125,000.

## *No Decision From Goldberg On Senate Race*

WASHINGTON, Dec. 4 (WP).—Former Supreme Court Justice Arthur Goldberg will decide "within a month" whether to run for senator from New York or governor of New York in next November's elections.

If he does decide to run for elective office in New York State, he "will do it on a shoestring."

He would try to prove to the voters that a "candidate can get elected without spending millions of dollars."

Now in private law practice in New York City, Mr. Goldberg discussed his future with friends from New York and Washington at a reception which he and his wife gave at their Virginia farm.

World famous golf pro Sam Snead. A man with many honours. Winner of such golf classics as The Masters, The British Open, The Canadian Open.

When Sam Snead drinks Scotch, he drinks Ballantine's.

He knows something.

The more you know about Scotch, the more you like Ballantine's.

**AN INVESTMENT CHECK-UP, PLEASE**

I understand that the information supplied on this form will be held in confidence, and that the only reason you ask for it is to help determine an appropriate investment program for my particular circumstances.

1. Name (PLEASE PRINT)
Address
Nationality
City State Zip
Home Phone Business Phone

2. My Investment Objectives:
(If more than one objective, indicate order of importance.)
☐ I am interested in relatively stable securities with excellent dividend records.
☐ I am primarily interested in good quality stocks that should increase in value over the years.
☐ I'm looking for stocks that are paying liberal dividends.
☐ I am interested in attractive speculations.

3. Personal Information:
Sex ☐ Male ☐ Female
Marital Status ☐ Single ☐ Married ☐ Widowed
Age ☐ 20-30 ☐ 30-40 ☐ 40-50 ☐ 50-60 ☐ over 60
Occupation or profession
Number and age of dependents
Any close connections with any company listed in portfolio

4. Financial Information:
Approximate annual income from all sources other than securities
Accumulated cash or savings
Cash now available for investment
Approximate annual savings Amount of life insurance
Real Estate-Home Other
Approximate tax bracket %
Other resources (pension expectations, participation in profit sharing plans, bequests, etc.)
Fixed obligations (mortgages, loans, etc.)

My present holdings are:

| Date of purchase | No. of Bonds or Shares | Name of Security | Unit Cost |
|---|---|---|---|

# NATO Nuclear Policy

It was inevitable that, as tensions in Europe lessened and the members of NATO began to feel less pressure to maintain their contingents of troops, greater tactical reliance should be placed upon nuclear weapons. The effect has been much the same as that policy of reducing, relatively at least, American conventional forces during the Eisenhower administration, a policy which was vulgarized into the expression: "More bang for a buck."

There are, however, significant differences between the new guidelines for the use of tactical nuclear weapons approved by the NATO defense ministers and the earlier emphasis on "massive retaliation" by the United States. The latter was accompanied by a positive expansion of American overseas commitments, and occurred at a time when great-power frictions were still acute. The NATO action comes during Soviet-American discussions on the possibility of reducing strategic weapons, and has been accompanied by serious consideration of a general security conference, covering all of Europe, between NATO and the Warsaw Pact countries.

In other words, while both emphases on nuclear weapons represented an effort to match economic realities to military demands, the one came at a time of expanding, the other during a period of diminishing, danger of major war.

*This is a hopeful sign. True, even the* warning use of tactical nuclear weapons by NATO would probably insure that any European conflict would become a nuclear holocaust—but that would be virtually unavoidable in any case of serious aggression. The initial use of conventional forces would provide at best a brief respite from the rain of bombs, should there be any massive thrust from the East. And the present arrangement is designed to avoid the instant escalation of any mere frontier incident into World War III.

The peril of such a catastrophe remains, of course. It is necessary that East and West, both the alliances and their leaders, agree upon methods of reducing that threat, through mutual reduction of forces, ballistic and conventional. But it is also well to bear in mind the observations of Sir Thomas Browne, more than three centuries ago: "We vainly accuse the fury of guns, and the new inventions of death; it is in the power of every hand to destroy us, and we are beholding to every one we meet, he doth not kill us."

It is the man behind the guns who must be controlled, and his fury—or fear, or greed—that brings the danger. Short of a complete conversion of the whole race to the doctrine of love, not war, it is the political and economic problems from which war springs that statesmen must attack.

# Europe's New Momentum

The wide-ranging decisions on economic and political union just taken at the Common Market summit meeting will do as much to spur British entry as the agreement to open *negotiations with London by July.*

The Hague communiqué, which contains some hard-fought compromises over vested interests, reads astonishingly like a manifesto of Jean Monnet's Action Committee for a United States of Europe—with which most of the ministers who were at the meeting long have been associated. After years of dissension introduced by Gen. de Gaulle, the European Economic Community is again pronounced a going concern. And, with President Pompidou's consent, it is going toward most of the old objectives De Gaulle opposed.

There is agreement progressively to permit the EEC to have its own revenue, presumably from customs duties, to the tune of billions of dollars—in place of contributions given and controlled by the six governments. The money would be used both for farm subsidies and for the community's general budget. Oversight by a strengthened European Parliament is declared the democratic concomitant. Only four years ago a proposal by the EEC Commission to move in this direction triggered a six-month boycott by De Gaulle of the community's activity.

There is not only agreement by the French to prepare for negotiations with the British "in a most positive spirit," but also French acquiescence that British entry "undoubtedly" is in the interest of the Common Market.

In return, President Pompidou won his partners' agreement to shape a common position for the negotiations with Britain and to pass from the transitional to the final stage of the Common Market beforehand.

Included in this arrangement would be the establishment by Dec. 31 of a "permanent" system for financing the farm subsidies that chiefly benefit France. Subsequent changes will require unanimity, i.e., French consent, but Mr. Pompidou has agreed that changes can be made to limit surpluses and facilitate British entry.

Perhaps the most significant aspect of the Hague compact was the decision of the Six to move toward a pooling of part of their gold and foreign currency holdings in a European reserve fund. This long step toward a common currency for external transactions was made possible by West Germany, the Continent's strongest monetary power.

The new momentum and cohesion in the Common Market, plus the renewed invitation to London, should restore public enthusiasm in Britain for joining the EEC. Britain's leaders of both major parties never turned off, but public interest did decline when the dissension-ridden community slammed the door in Britain's face for the second time.

Revival of interest is predicted now that the door to a cohesive Europe is being opened again. For both the British and the Six, the difficult adjustments involved in Britain's entry into the EEC will be much more easily made with the present clear signs that the Common Market is on the upgrade again.

THE NEW YORK TIMES.

## *International Opinion*

### *The Six and Britain*

The sort of timidity which prevented [President Georges] Pompidou from taking advantage of the exceptional chance offered him of showing all of Europe its way at the Common Market summit is to be regretted.

By not accepting this chance, either out of natural prudence or out of a concern not to displease the ruling majority [in France], he let the star of the conference be Willy Brandt, who spoke the words of an inspired statesman and can boast to his compatriots that he made Paris give way on the question of Britain's candidacy.

*—From Le Monde (Paris).*

* * *

Naturally, none of the heads of state or government meeting at The Hague had the courage to confront openly the real crux of the problem of admitting Britain: the fact that its entrance would raise political questions as well as economic ones.

*—From L'Unità (Rome).*

* * *

Europe (without De Gaulle, the old abominable no-man) is on the move again. The new and dynamic factor in the European equation is Willy Brandt, the West German Chancellor. He not only says he wants Britain in the market. He is prepared to shove. And he did.

What is crucial now is that Harold Wilson and Edward Heath *should continue to show* themselves as keen to take Britain in, on fair terms, as Mr. Brandt is to pave the way. And that when talks start, Britain should know precisely what it wants.

*—From the Daily Mirror (London).*

### *A Matter of Conscience*

There is no longer any political justification for the Vietnam war. Morality is now paramount and morality, which means the conscience of each of us, demands that the war stop.

The horror of the massacre of My Lai has jolted our consciences back to reality.

It is not just the butchering of babies on that infamous day in March last year. It is that My Lai is the symbol of all the black patches of ground which were once Vietnamese hamlets, and of all the Vietnamese civilians who have died. . . My Lai has brought back to haunt us every napalmed mother, every weeping old man, every child shot in the hole in which he was sheltering.

Never again can My Lai and all it means be justified in terms of political objectives —resisting external aggression, "propping up the dominoes," letting the Vietnamese people decide their own future. The dead don't vote.

*—From The Australian (Sydney).*

## In the International Edition

### Seventy-Five Years Ago

Dec. 5, 1894

SHANGHAI—It is believed here that China cannot afford to accept the conditions of peace proposed by Japan, however desirous she may be of ending the war. It is considered that it would be absolutely fatal to her prestige abroad and to the reigning dynasty at home to abandon Mukden, which was the old capital of the Manchu dynasty. But in any case the appearance of the Japanese Army at Peking will sound the death-knell of the Manchu dynasty.

### Fifty Years Ago

Dec. 5, 1919

LONDON—One of the greatest sensations ever produced in the boxing ring was created tonight, when Georges Carpentier of France knocked out Joe Beckett of England, in just over one minute of the first round. The contest took place at the Holborn Stadium, London, before a large throng, including the Prince of Wales. Besides retaining his title of heavyweight champion of Europe, Carpentier won the right to challenge Jack Dempsey.

*'Who Is This Heah Impudent Snob?!'*

# The Left vs. the Warren Court

By Joseph Alsop

WASHINGTON.—Once again, the unspeakable has been spoken, the unmentionable has been mentioned, the unsayable has been said. This is a remarkable event; and *if one looks ahead*, it is probably a major political portent.

To be specific, the "Warren Court" was under bitter, sustained attack from the right from the time of the school desegregation decision, in 1954, until Chief Justice Earl Warren laid down his judicial robes. But now the Warren Court, and almost all its works and ways, have been sharply, cogently and powerfully attacked from the left.

The attacker is a brilliant contributing editor of The New Republic, Prof. Alexander Bickel of the Yale Law School. Furthermore, the two greatest monuments of the Warren Court, the school decision in Brown vs. Board of Education, and the so-called "one man, one vote" decision, are the principal targets of Prof. Bickel's criticism.

Prof. Bickel first spoke out when he recently delivered the Oliver Wendell Holmes lectures at the Harvard Law School. Vague reports of this remarkable lecture series thereupon caused a good deal of apprehensive fluttering in the inner dovecotes of American liberalism.

Far more widespread, acrimonious and public debate is bound to be touched off, however, by Prof. Bickel's forthcoming book, "The Supreme Court and the Idea of Progress." This is an expanded version of the Holmes lectures, complete with all the critical apparatus required by a major work of legal theory of the most serious possible character, which this book unquestionably is.

The thrust of the book is expressed in a single pungent sentence, as follows: "The Warren Court's noblest enterprise—school desegregation—and its most popular enterprise—reapportionment—n o t to speak of the school prayer cases and those concerning aid to parochial schools, are heading towards irrelevance, obsolescence and *in large measure, abandonment.*"

A newspaper column is no place to try to recapitulate the kind of careful argument on which Prof. Bickel bases the foregoing conclusion. It is enough to say, rather crudely, that Prof. Bickel finds that the school desegregation decision has not worked very well thus far, in a practical sense. And he further holds, obviously correctly, that Brown vs. Board of Education runs directly counter to the rising demand of black militant leaders for "black community control" of Negro schools.

### *Political Leverage*

As to the one man, one vote decision, Prof. Bickel's objections are even harder to summarize in a few words. But one of them is certainly his opinion, again obviously correct, that th main beneficiaries of the resulting reapportionment are bound to be the ever-growing white suburbs, while the increasingly black center cities will lose leverage proportionally.

To the sentence already quoted, Prof. Bickel adds the observation that "If this assessment has any validity, it must be read as a lesson." The lesson he seeks to inculcate is that the courts in general, and the Supreme Court in particular, are most imperfect instruments of social and political reform—however desirable s u c h reforms may be. He would therefore have them leave reform, in almost all cases, to the elected members of the state legislatures and the Congress.

This reporter is wholly unqualified to discuss, much less to pass upon, the complex and profound contitutional issues t h a t Prof. Bickel has raised. They were already being raised, before his retirement from the court, by Justice Felix Frankfurter. They are now being raised, in certain specific cases, by Justice Hugo Black. That is all a reporter can properly say about the issues themselves.

The political meaning of Prof. Bickel's book is something else again, however. Against the Warren Court and all its works the ranks of the American right wing have always been solidly arrayed, as above noted. But this book represents the first significant break in the ranks of the American left. There is now division just where the Warren Court always obtained its strongest support.

One must say "the first significant break" because, of course, the black militants' demands for "community control" were also a break of another kind. The arguments for the so-called Demonstration *School Projects in New* York City, for instance, might have been made to order to support George C. Wallace's approach to the school problem in the South.

But when a man of Prof. Bickel's stature openly breaks the former liberal-intellectual solidarity on this matter, there is no foretelling the final outcome. It is only clear that a new phase has opened.

# *America's Other War*

By Tom Wicker

WASHINGTON.—No matter how they might feel about President Nixon's policy on the Vietnam war, most Americans probably agree wholeheartedly with that part of his Nov. 3 speech in which he declared that "the American people cannot and should not be asked to support a policy which involves the overriding issues of war and peace unless they know the truth about that policy."

The only trouble with this is that it is likely to run head-on into someone's concept of national security requirements: apparently, that is just what is happening as concerns the shadowy warfare that has been going on for so long in the remote, mountainous terrain of Laos.

A Senate subcommittee under the chairmanship of Stuart Symington of Missouri has been taking extensive testimony on the Laotian war and the extent of American participation in it, but now the State Department wants to prevent publication of much of that testimony on security grounds.

The Symington subcommittee is convinced that the State Department wants to censor the testimony past all legitimate security reasons, to the extent that a distorted and untrue picture of the Laotian situation would be presented to the American public; therefore, the subcommittee is taking the position that it will not publish the testimony at all until a generally accurate version of it can be cleared.

### *U.S. Air Support*

This directly invokes the doctrine Mr. Nixon laid down Nov. 3, because Laos surely concerns "the overriding issue of war and peace." North Vietnamese-supported forces and North Vietnamese units have been trying to gain control of Laos at least as long as, and even more openly than, they have been engaged in South Vietnam; and "loyalist" forces supported by the CIA and by American aircraft and pilots have been doggedly fighting back for just as long. There is no evidence that American ground troops are in combat in Laos, but Henry Kamm of The New York Times, after a thorough investigation on the scene, recently wrote from Vientiane:

"There is no doubt here that North Vietnam, if it were prepared to expend the necessary strength, could confront the United States with the agonizing choice of seeing Laos fall or engaging ground troops in battle."

This "choice" does not yet seem to have been presented, and while North Vietnam is under heavy manpower, logistical and economic pressures from its undertaking in South Vietnam, it probably won't be; but in an ironic twist on the domino theory, anything that puts an end to those pressures in the South, including *defeat* for Hanoi as well as victory or a negotiated settlement, could cause North Vietnam to try either to recoup or to keep up its momentum in Laos.

Just last summer, for instance, forces trained and supported logistically and in the air by Americans recaptured the strategic Plaine des Jarres; farther south, this encouraged other American-supported troops to strike toward the Ho Chi Minh Trail and they took the Communist base at Muong Phine. But dispatches from Vientiane reported this week that these efforts had overextended the pro-American troops, and now a counteroffensive has retaken Muong Phine and other outposts and threatens even more important towns in the Laotian "panhandle."

### *Lethal Leapfrog*

It is this kind of thrust and counterthrust that can lead to mutual escalation, to the kind of lethal leapfrog that built up to a major ground war in Vietnam. It is all very well to say that affairs are being managed more prudently in Laos (where in the current bureaucratese the United States has a "lower silhouette"), but the potential of this hidden war is nevertheless ugly and menacing. It may well be asked how well the American people understand this, and how many of them even know about the sizable American commitment in Laos.

How much, for instance, is it costing American taxpayers? Nowhere in the pending defense appropriation bill can one find an answer—although Secretary Laird says that all Southeast Asian operations, including Laos and Vietnam, are estimated at $23.2 billion for the year ending next June 30.

One reason for the secrecy surrounding this remote conflict is that the United States as well as North Vietnam is violating the Geneva accords of 1962, which supposedly established Laotian neutrality; another is the heavy and embarrassing dependence of Prince Souvanna Phouma's government upon American backing. But the net effect is that once more, as in Vietnam, the American people are being asked to accept on faith, rather than on facts, a war that might not always remain small and manageable.

# *Sex and Sense*

By C. L. Sulzberger

COPENHAGEN.—Perhaps the most interesting sociological experiment in Europe is Scandinavia's new approach to sex and unblushing acceptance of pornography as a fact of life. In these respects Denmark leads the northern vanguard. There is nothing in the least bit either unwholesome or immoral about the Danes, who simply share with Benjamin Franklin, "an American never renowned for excessive puritanism, a belief that honesty is the best policy.

Western civilization, which has been marked by Catholic and Calvinistic disapproval of earlier pagan joys, has probably never before gone to the extent of legalizing pornography in the fashion endorsed by the Danish parliament between 1967 and 1969. But then, after all, the Danes are merely acknowledging in law what the most richly imaginative Hindu temple carvings long since proved—that there is a finite, mathematical limitation to the antics depictable in amorous relationships and beyond this boredom sets in.

An interesting political aspect of Denmark's sex revolution is that it is a non-party affair. Knud Thestrup, conservative Minister of Justice, played an active role in legalizing the concept that to an adult nothing is pornographic. He argued that "public authorities should not censor what the adult individual wants to see and read."

An even more audacious bill was proposed by the Socialist People's party which called for legal "marriage" between persons of the same sex, between brother and sister or between one man and an unlimited number of women. This proposal was turned down. Nevertheless, what are called "megafamilies"—groups of unrelated adults of both sexes and their children—are now an accepted phenomenon on the contemporary scene.

### *Isolation Broken*

Rachel Baeklund, an editor of the highly prestigious newspaper Politiken, reported of these: "They feel they are a big family because they practice group sex, take care of each other's children when necessary, along with daily contact of such a nature that the traditional isolation of the family core is broken."

The megafamily, of which more than 50 are known to exist, lives in a single house and professes moral standards peculiar to itself. According to Miss Baeklund, group sex sessions are held two or three times each week in which participants "compete to find new daring intercourse positions" but it is considered improper to "have sex under private conditions with other members of the group than one's steady partner. Otherwise this is infidelity."

Scandinavia's sociological background undoubtedly differs from other parts of Europe. Dr. Henrik Hoffmeyer, a psychiatrist at Copenhagen University, points out: "As far back as historic records show, a liberal attitude toward relations between the sexes has existed in Denmark."

Some students contend this derives in part from the area's earliest matriarchal societies, which tend toward freer sexual and social relationships. Erik Manniche, a university lecturer, says that from 1650 to 1880 church registers show almost half of Denmark's women were pregnant at the time of marriage. The drop to about 30 percent since then is attributed to availability of contraceptives.

Thestrup believes that "to the adult person with a normal sex life pornography soon becomes boring and disgusting." He argues that the decline in pornographic interest since the ban was lifted is because there is now less "human curiosity in forbidden things and an urge to break a taboo."

### *'ABZ of Love'*

Two psychologists, Inge and Sten Hegeler, wrote a book called "An ABZ of Love." Hegeler says: "When it was published in 1961 a complaint was lodged with the police. Today parents often give it to their children as a present at confirmation."

Broadminded religious traditions have helped Denmark develop its revolutionary approach and the Lutheran Church never opposed legalization of pornography. Pastor Karen Horsens, a woman, says "the job of the church is to proclaim its message, not to preach morals. Morals are only a set of practical traffic rules agreed upon by society for its own sake."

The result of permissiveness is still hard to measure. Nevertheless, pilot studies show a decline in sexual delinquency. Pastor Horsens thinks "in Denmark and Sweden, where restrictions have also been removed, the ratio of sexual crime is dropping."

The Danish experiment cannot be regarded as necessarily valid for other societies with quite different backgrounds. Nevertheless, it is admirable for its bold effort to sweep aside shibboleths that have been confusing mankind for centuries.

# Letters

### Swedish Friends

In his article "Sermon from Sweden" (Nov. 26) C. L. Sulzberger states that "if there is a great silent Swedish majority that likes the United States, it is now notable for its silence."

I believe there is such a majority. Or at least there are more people who like the United States than dislike it, apart from the large group of people who don't care one way or the other. There are, in fact, three groups to consider with different views on the United States.

On the left we first have the young, irresponsible, loudmouthed haters, flagburners, etc. They are often heard and seen on radio, television and elsewhere. Far too often we have to witness the inconceivable and utterly mad activities of this leftist group. It is considered totally fruitless even to start a discussion with them. Their appearances are less frequent nowadays, I must admit.

Secondly we have the Social Democrat leaders and their followers. Although all of them are strongly critical, not all are against the United States. In fact, our new prime minister, Olof Palme, *after having reached his high office, has* declared that he understands and likes the United States even if he *does criticize.*

The third group is what could well be called the silent majority. Not completely silent, though. I could cite editorials and articles from some prominent newspapers and magazines to prove that this group has a voice. But of course they are seldom to be found on radio or TV.

Anyhow, you may rest assured that the Socialist leaders do not speak for all the Swedes. On the other hand, even the friends of America can't help being critical but so are some great Americans.

Still, the United States has many friends in Sweden: they may be rather silent, but they are numerous.

RUNE HASSELGARD
Gothenburg, Sweden.

### After the Picnic

Vice-President Agnew (IHT, Nov. 11) described the Vietnam anti-war demonstrations as "carnivals in the streets" which proved nothing, and Stewart Alsop in Newsweek (Dec. 1) observed that "the kids" were just having a lot of fun shouting "pigs" at the police and "fascists" and waving Viet Cong flags.

What the exuberant American youngsters enjoyed most, though, was being together; boys and girls touching and holding hands, having the feeling that they were a part of the exciting world we are living in—having, in short, a rollicking good time.

Their peace marches are romantic and perfectly safe—barring a possible whiff of harmless tear gas, seldom does anyone get hurt. But when the day's rampaging is over, Washington looks a mess. Therefore, it was with pleasure that I read in the IHT about four Southern members of the House of Representatives who introduced legislation that would require leaders of demonstrations to post bonds to cover the costs of extra police and the cleaning up.

Rep. Joel T. Broyhill, R., Va., one of the sponsors, said that the November "New Mobe" shindig cost the government more than $1.5 million. The proposed bill carries stiff penalties for failing to make full restitution of the cost of cleaning up federal property. Since it appears that the war will not be over for at least another year, the irresponsible peace-loving p r o-Hanoi appeasers will frolic through the streets a dozen more times and bring the cost of the monthly cleanup bill to a grand total of approximately $20 million. That is a lot of money, but an unnecessary burden on the taxpayers. It is good to know something is being done about the matter.

STEPHEN MADERICK
Clamart, France.

### Forbidden Fruit

Although it is gratifying to know that the powers that be in HEW are concerned about the physical well-being of Americans, the recent ban on cyclamates seems to be *unduly hasty and to be based* on rather inadequate evidence of its supposed pathogenicity for humans in the quantities usually consumed.

If cyclamates be sufficiently toxic to necessitate such drastic action by Secretary Finch, why, we might ask, does he not also include cigarettes among the forbidden fruit? Surely the evidence against cigarettes is overwhelmingly more concrete than that advanced to indict cyclamate.

Many diabetic patients are able to adhere to their rigid diets only because their food has been made more palatable by the addition of this compound. Now they have been unnecessarily frightened with the scare of impending cancer, by the public announcements of malignant tumors arising in laboratory animals given very large doses of cyclamate. No cases have been proven in man, nor has there been any substantial statistical data accumulated, as in the case against cigarettes. Can it be that the soda-pop makers do not wield as much influence as do the big tobacco interests?

Until proven in a manner acceptable to most experienced physicians, I will continue to advise my patients to ignore this edict, and to write to their elected representatives for an investigation into this arbitrary abuse of power by HEW. Are we men or are we mice?

JEROME MOREY M. D.
Fort Lamy, Chad.

### McSorley's

In the interest of accuracy, McSorley's is located in the Bowery, not Greenwich Village (People, Dec. 1). Also, it is known as McSorley's Saloon, not bar. I report from experience, since it was a favorite watering hole for sailors *during World War II, when it had* a free lunch and a nickel beer.

EDWARD H. KOLCUM.
Geneva.

# U.S. Panel Fears Violence Will Replace Legal Protests

By James M. Naughton

WASHINGTON, Dec. 4 (NYT).—Group violence in America poses a danger that "extreme, unlawful tactics will replace legal processes as the usual way of pressing demands," the National Commission on the Causes and Prevention of Violence warned today.

The commission, in a 16-page statement on group violence, made clear that it views violent tactics as a threat to the democratic process, whether they are used by protestors or their opponents.

Despite increased violence in the past decade of social unrest, the commission found that the "widely held belief that protesting groups usually behave violently is not supported by fact."

But it expressed a sense of urgency that the nation take steps now, before group violence becomes more prevalent, to make it "both unnecessary and unrewarding" as a political tactic.

### Series of Reports

Ever since the commission was established by President Johnson on June 10, 1968, it has emphasized in a series of reports the need for renewed vigor by government and society in reaching the goal of equal justice.

The same theme underlies the commission's latest report. To it are added pleas that channels be kept open for the expression of protest, but that violence by dissidents within society or their opponents be controlled through firm, but fair, action under the nation's laws.

Specifically, the commission recommended:

● Police departments should improve their capacity to anticipate, prevent and control group disorders.

● The President should seek legislation granting federal courts jurisdiction to grant injunctions, sought by the attorney general or private citizens, against "threatened or actual interference by any person, whether or not under state or federal law, with the rights of individuals or groups to freedom of speech, freedom of the press, peaceful assembly and petition for redress of grievances."

● Private and governmental institutions should encourage development of competing news media and discourage "increased concentration of control over existing media." Further, journalists should continue to improve and reevaluate their standards and practices, including creative self-criticism.

### Complex Society

At the heart of the commission's report was the belief that violence is not new to American history, that it is best avoided by providing peaceful methods of voicing protest and that, in the complex U.S. society of today, there is an increasing burden on news media to analyze and explain social problems.

"All societies generate some discontent because organized life by its very nature inhibits most human beings," the report said. "Group violence occurs when expectations about rights and status are continually frustrated and when peaceful efforts to press these claims yield inadequate results."

"It also occurs," the report said, "when the claims of groups who feel disadvantaged are viewed as threats by other groups occupying a higher status in society."

Violent conflicts between such groups occur more frequently in times of rapid social change, the report said. Since America always has been a nation of rapid social change, violence is not new to it.

## U.S. Orders Removal Of Gas From Okinawa

WASHINGTON, Dec. 4 (UPI).—Poison gas will be removed from Okinawa and returned to the United States in five shiploads to be delivered by next spring, Army Secretary Stanley Resor announced Tuesday.

Defense Secretary Melvin R. Laird promised the removal last July when 33 persons on Okinawa were injured as a result of a "leakage" of poison gas.

Mr. Resor's announcement said that "it is anticipated that the first shipment will leave Okinawa later this month or in January."

Associated Press.

**BOMBS AWAY—New York's bomb squad has a busy day removing a "toy" 500-pound bomb (top) from a Brooklyn courtyard and a training bomb a few blocks away.**

## *After Two Years as Children's Toy, Live Bomb Is Defused in Brooklyn*

NEW YORK, Dec. 4 (NYT).—A live, rust-colored World War II aerial bomb that neighborhood youngsters said they had been playing on for two years was removed yesterday from a rubble-strewn building site under the Pulaski Bridge in Brooklyn.

Three blocks away another missile—possibly a training bomb—was found in a small garden.

The 500-pound bomb, which came to the attention of the police today, was defused while traffic was routed off the bridge overhead that connects Brooklyn and Queens. The device was then trucked to a police range in the Bronx for further dismantling.

As the bomb was being hoisted onto a police department truck, three 10-year-olds stood among newsmen about 100 yards away. "Hey, look," said Michael Perez of Brooklyn, "they found our bomb."

He and his friends then told a reporter how they had played on the bomb for the last two years. "We used to ride it like a horse," Michael said.

How the bomb got to the junk heap remained a mystery.

# U.S. Eases Entry of Aliens Who Will Work as Domestics

By Peter Millones

NEW YORK, Dec. 4 (NYT).—The United States Department of Labor, badgered for many months by irate women unable to obtain satisfactory domestic help, has decided to ease its restrictions on the entry of available foreign labor.

"We are not opening the floodgates, but we have changed the emphasis," Frank Busbee, chief of the Division of Immigration Certification, said in an interview.

He and other top Labor Department officials are convinced that they do not have the solution to complaints from women in New York and elsewhere about the rapidly dwindling supply of live-in child-care women, maids, cooks and daytime household workers.

But they are prepared now to be "more realistic" before denying application from American families for foreign domestics.

### Shift in Policy

The policy shift comes at a time when some employment agencies, unhappy over fee losses, have been threatening to organize protest marches on the Labor Department, and some immigration lawyers have started suits challenging some of the department's actions on alien domestic applications.

A study of the domestic-help situation has shown the following:

● The Labor Department approved 15,500 applications in the last fiscal year—62 percent of those it received—despite complaints from some agencies, some lawyers and others that few domestics have been allowed to enter the United States in the last year.

● The number of American domestics is diminishing each year, in large measure because of low wages, the stigma attached to domestic work, and racial tension between whites and blacks, while rising affluence has made more families seek household help.

● Some women, such as teachers, nurses and other professional workers, have remained at home rather than return to work because of their inability to obtain satisfactory live-in help.

● The domestics shortage and tight entry restrictions have encouraged many aliens—believed to be in the thousands—to enter the United States on tourist visas, "disappear" throughout the country and take jobs illegally, risking apprehension and deportation.

By and large, the source of domestic help for Americans has come from two areas—low-income Americans, mostly Negroes, and immigrants.

The trend away from domestic work among Americans has been evident for some time. For example, the Bureau of Labor Statistics reports that in 1965 29.2 percent of the non-white females employed were working in private households. This year, only 18.6 percent are in private households.

The obvious reason for the decline, aside from the stigma, is the traditionally low pay for domestics, even now $1 an hour in some cases, although many employers meet or exceed the Labor Department's requirement that aliens be paid $1.75 an hour plus room and board.

The other source—immigrants—has been sharply curtailed by the rising prosperity of European countries, which has discouraged emigration, and more importantly by changes in 1965 in the U.S. immigration laws.

## 3 Ex-Presidents' Homes Made Historic Sites

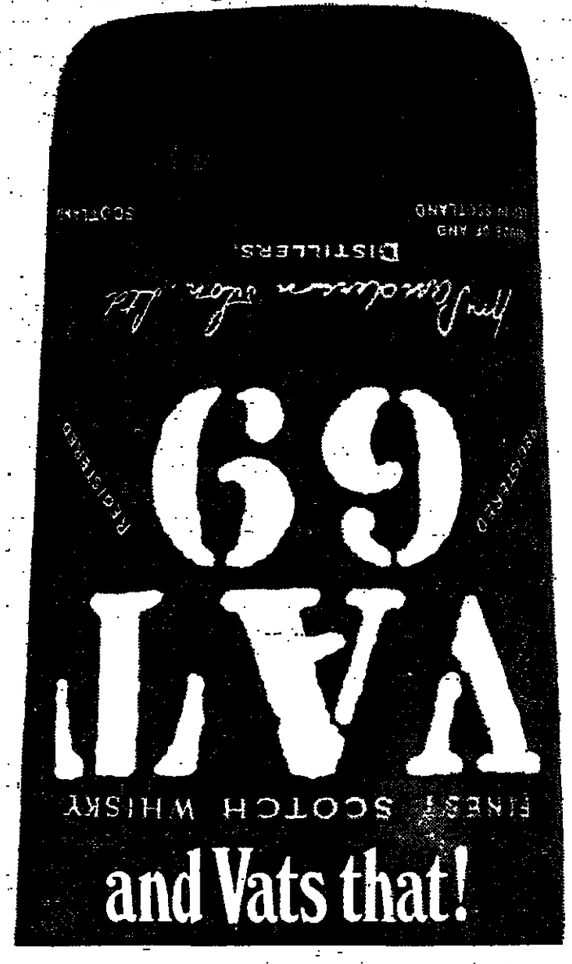

WASHINGTON, Dec. 4 (Reuters).—President Nixon has designated the birthplace and the boyhood home of former President Lyndon B. Johnson as national historic sites. The two sites are near Johnson City, Texas.

He also has signed legislation making the late President Dwight D. Eisenhower's Gettysburg, Pa., house, and William Howard Taft's home in Cincinnati, Ohio, national historic sites.

## Rabies Law Tightened

LONDON, Dec. 4 (Reuters).—Britain today tightened its protective laws against rabies by lengthening quarantine periods for dogs and cats from six to eight months and banning the import of many animals susceptible to the disease, unless they are intended for zoos and research establishments.

# Twenty 1969 Books (Fiction and Non-Fiction) to Keep and to Lend

By Christopher Lehmann-Haupt

NEW YORK (NYT).—We have now entered the season when it is time to start compiling lists of "outstanding," "bests," "mosts," and year-end reading recommendations. Doing this to books has always seemed to me like lining up a frog, a dugong, a waterbug and a puma, and telling them: "First one to the outhouse and back is king of the beasts." Every book does its own thing, to use Ralph Waldo Emerson's exhausted phrase for the last time this year; some books do it better than others, to be sure; but it's so hard to compare.

My own criterion for judging a book has always been whether or not I want to keep it—to reread, to look something up in, to lend to friends, or to support other books. So herewith a list of 20 that I've kept and why. Not included are books that I haven't read, books reviewed by other New York Times reviewers, John Leonard and Thomas Lask, as well as gift books, extravaganzas, and children's books. The 20 books are listed alphabetically under fiction and non-fiction.

## Fiction

*The Book of Numbers*, by Robert Deane Pharr (Doubleday, $5.95)—A sprawling slice of Negro life in a Southern town, crudely but powerfully written.

*Camden's Eyes*, by Austin Wright (Paris Review, Doubleday, $5.95)—A comic epistemological thriller, beautifully written and set in the head of an owlish professor who is trying to figure out why sex is rex.

*The French Lieutenant's Woman*, by John Fowles (Little, Brown, $7.95—A marvelously ornate Victorian love story, and a trap for those who believe it.

*The Godfather*, by Mario Puzo (Putnam's, $6.95)—Though it's debatable whether Puzo has more sex appeal than Jacqueline Susann, he has written the ultimate commercial novel about the ultimate commercial subject. To be kept for lending to inlaws and friends in the hospital.

*Good Times*, by Lucille Clifton (Random, $4)—Lean, hard, angry, graceful poems by a black woman from Baltimore.

*Portnoy's Complaint*, by Philip Roth (Random, $6.95)—Overpraised and overdamned for all the wrong reasons and few of the right ones, a novel to be kept if only to see how it reads in ten years.

*Pricksongs and Descants*, by Robert Coover (Dutton, $5.95)—Experimental "fictions" that make up a magician's show that can be watched again and again.

*Slaughterhouse-Five*, by Kurt Vonnegut jr. (Seymour Lawrence, Delacorte, $6.95) — In which the reader experiences the ironies of the firebombing of Dresden, World War II and all other wars. To go on your shelf with the rest of your Vonneguts.

*Who Took the Gold Away*, by John Leggett (Random, $6.95)—A flawed novel, clumsily structured and patly concluded, which nevertheless brings to life a haunting and complex relationship between two Yalies.

## Nonfiction

*The Baseball Encyclopedia* (Macmillan, Information Concepts, $25)—Large for a book, small for an amusement park, an essential collection of computer-compiled statistics that can be used to while away spare months.

*Dear Doctor Hip Pocrates*, by Eugene Schoenfield, M.D. (Grove, $5)—A collection of medical columns from the Berkeley Barb, filed with "advice your family doctor never gave you." For the medicine cabinet.

*The Economy of Cities*, by Jane Jacobs (Random, $5.95)—A theory of economic life and the role of healthy cities so outrageous as to seem at once simplistic and profound. To be kept in anticipation of the attempted rebuttal that has not yet appeared.

*The End of Liberalism*, by Theodore J. Lowi (Norton, $6.95)—A highly academic, yet provocative argument that we are not yet out of the woods of 19th-century Liberalism.

*Gandhi's Truth*, by Erik H. Erikson (Norton, $10)—Blinding light on a dozen subjects, including nonviolence, colonialism, biography, psychology . . . I could go on.

*The Lives of Children*, by George Dennison (Random, $6.95)—A moving journal-history of an experimental, storefront school, by an artist-writer-educator-psychologist who taught there.

*The 900 Days*, by Harrison E. Salisbury (Harper & Row, $10)—A newspaperman's harrowing reconstruction of the siege of Leningrad. To make you appreciate your next can of beans.

*Present at the Creation*, by Dean Acheson (Norton, $12.50 pre-Christmas, $15 thereafter)—Memoirs of a State Department career, to be kept because it is more compact than the 12 years worth of newspapers it supplants.

*Robert Kennedy*, by Jack Newfield (Dutton, $6.95)—A commendably biased memoir of the late senator by a reporter who was there and cared.

*The Roots of the Modern American Empire*, by William Appleman Williams (Random, $15)—The father of revisionist history brilliantly updates the "frontier thesis" of Frederick Jackson Turner. To be reread at the Apocalypse.

*An Unfinished Woman*, by Lillian Hellman (Little, Brown, $7.50)—The silences are as eloquent as the sounds in this memoir of a playwright who thinks of herself as a person.

Edmund PENDLETON
will conduct his lyric-drama
The MIRACLE
of the
NATIVITY
and his Alpine Concerto
for flute and orchestra
Friday, Dec. 12, at 9 p.m., in the
AMERICAN CHURCH,
65 Quai d'Orsay, Paris.
Reservations (7 to 20 Fr.) at the Church (Tel.: 468-32-60) and at Durand's, 4 Place de la Madeleine, Paris.

### *Emerson on Doing Your Thing*

"If you. . .vote with a great party either for the government or against it, maintain a dead church, contribute to a dead Bible society, spread your table like base housekeepers—under all these screens, I have difficulty to detect the precise man you are, and of course so much force is withdrawn from your proper life. But do your own thing and I shall know you. . ."

Ralph Waldo EMERSON (1803-1882)
"Self Reliance."

## Huston Will Film 'Agony at Easter'

NEW YORK, Dec. 4 (NYT).—John Huston, the American-born director who has lived in Ireland for 18 years, plans to make a movie there dealing with the 1916 uprising in Dublin.

He has acquired film rights to "Agony at Easter," the book by Thomas M. Coffey about the rebellion against British rule and published in September by Macmillan.

An Irish citizen since 1964, Mr. Huston lives on a 100-acre estate in County Galway. Recently he completed a leading role in Hollywood in "Myra Breckinridge," the 20th Century-Fox version of the Gore Vidal novel.

Mr. Huston is currently in Italy, working in another leading role, as a Confederate general in "The SOBs," which Dino de Laurentiis is producing.

According to a spokesman for Mr. Huston, "Agony at Easter" is to be ready for filming early in 1972. Other films Mr. Huston has made in Ireland are "The List of Adrian Messenger" and the recent "Sinful Davey."

The director is working with Gerald Hanley, an Irish novelist, on the adaptation of "Agony at Easter," but will make "Bullet Park" for 20th Century-Fox first, the spokesman said. That novel, by John Cheever, published in April by Knopf and dealing with suburban family life, is to go before the cameras early next year.

# *Gory Jacobean Dramas Revived in London*

● "The White Devil," by John Webster
● "Revenger's Tragedy," by Cyril Tourneur

By Thomas Quinn Curtiss

LONDON, Dec. 4.—The drama of Jacobean England is again in favor. Perhaps its surging violence, bloodshed and black despair are more akin to our melodramatic, atomic age than they were to the forward looking 18th and 19th centuries when such plays were held offensive to good taste and were rarely seen in the public playhouse.

In any case, two of the gaudiest products of the savage school are at the moment hits in London. The National Theatre has taken John Webster's "The White Devil" down from the library shelf and set it in turbulent motion behind the footlights. The Royal Shakespeare Company has staged Cyril Tourneur's long-neglected "Revenger's Tragedy" at the Aldwych.

Though scorned for so long by the theater, both plays have high literary reputations. University students have acted them during centuries of official exile. The plays give a delirious view of the blood-stained intrigues and vice of 15th-century Italian court life—not unlike the distorted outlook of the modern theater of the absurd

Critical dispute over these dramatists has been sharp. Bernard Shaw, who objected to Shakespeare's nihilistic utterances, dismissed Webster contemptuously as "a Tussaud laureate" and was apparently deaf to his poetry. Nothing could be more un-Shavian than "The Wild Devil" with its accumulation of assassinations, incessant cruelty, charnel-house undertones and depiction of human beings as enraged wild beasts. Swinburne, however, found the subtle and sublime passages of Webster equal in sheer force to Aeschylus and Dante.

Both resurrected plays are well served in their present productions. Piero Gherardi, Fellini's art director, did the decor for "The White Devil," setting the play against an imposing background of crumbling Roman walls, an appropriate site for this drama of unbridled lust and poisoned kisses, in which each foul conspiracy breeds another.

Geraldine McEwan of drawling voice and feline indolence is the demonic Vittoria. Edward Woodward, a fine actor, is her pandering brother, as dark and as cunning a villain as the theater knows. Derek Godfrey is the evil duke, John Moffart is the shrewd cardinal who becomes pope and Jane Lapotaire is the serving girl as tricky as her betters. Together they contribute a brilliant and fascinating ensemble performance.

The Royal Shakespeare Company's "Revenger's Tragedy" is less elaborate scenically. It moves swiftly on a circular stage and has been dressed in a rich array of Renaissance costumes. Theatrically it is less expert than "The White Devil" and requires considerable directorial assistance in avoiding to fall into the ridiculous—as, for example, in the scene in which the two brothers discover that the wrong head has been chopped off. But Trevor Nunn's staging is extremely resourceful and he has gathered an exemplary cast: Ian Richardson as the avenging Vendice, Alan Howard as the duke's eldest son, Lila Kaye as the mother torn between greed and honor and Helen Mirren as the threatened maiden. They score strongly in their demanding roles, shining glowingly in this macabre melodrama of often exquisite imagery.

# Music in London: Action and Reaction

By Henry Pleasants

LONDON.—Opera has been in a critical condition since the turn of the century and the poles of opera philosophy which produced the crisis could not have been illustrated more vividly than in the production here on successive evenings of "La Gioconda" by the London Opera Society and "Pelléas and Mélisande" at Covent Garden, the latter with Pierre Boulez making his Covent Garden debut as conductor.

"La Gioconda" represents the ultimate in blood-and-thunder toward which opera had been heading since the triumphs of Meyerbeer, Auber and Rossini in Paris in the 1820s and 1830s. "Pelléas and Mélisande" represents the reaction, an approach to opera in which music is seen as servant and elaborator of the text and the principal musical role assigned to the orchestra at the expense of the singer.

Of the two, of course, "Pelléas and Mélisande" has had the greater influence on opera composition in this century. "La Gioconda" probably appeared old-fashioned when it was new in 1876 and already a bit ridiculous. The kind of singing it calls for, in the throats of any but the greatest singers, comes pretty close to bawling, and in the throats of others it is just that.

But "Pelléas and Mélisande" has its pitfalls, too. Debussy, seeking a vocal articulation closer to the cadences of speech, came up against the fact that a recitative vocal line, because of the melodic restrictions imposed by the prescribed pitches, can be less musical, less lyrically communicative, than speech. It is the fact upon which most subsequent opera has foundered, and its implications were certainly acknowledged by Schoenberg in his move toward what he called *Sprechstimme*.

The strengths and weaknesses of each approach were evident in both productions, more dramatically so in "Pelléas and Mélisande" because of Boulez. It is hardly conceivable that Debussy's opera has ever been played so perfectly, or even so beautifully—or that it has had less effect as theater.

Under Boulez's absolute sovereignty everything was centered in the orchestra, and everything emanated from the orchestra. One remembers "Pelléas and Mélisande" in terms of Mary Garden, Maggie Teyte, Lucrezia Bori and Edward Johnson. No one will remember this production in terms of Elisabeth Soederstroem and George Shirley, although both are fine artists. This was Boulez's show, so marvellously realized in the orchestra that one found the singers getting in the way. It was wonderful, but it was somehow not right.

"La Gioconda," in a single concert performance put together in a week when Montserrat Caballe had to cancel the scheduled "Faust," and the first London production in 40 years, benefitted from the fact that the opera has been in the Metropolitan repertoire for several seasons as a vehicle for Renata Tebaldi. Two of the Metropolitan cast, Sherill Milnes as Barnaba and Mignon Dunn as Laura, both making a London debut, were on hand to show how this music should be sung. Milnes, especially, was welcomed as the latest in a long line of great American baritones.

The Gioconda was Elena Suliotis, whose persistent and reckless abuse of a potentially great voice is beginning to take the inevitable toll. Bernabe Marti, Caballe's husband, as Enzo, sang a lot better than the local critics were disposed to acknowledge.

### Rembrandt: $72,000

LONDON, Dec. 4 (UPI).—A small pen and ink drawing by Rembrandt sold today for £30,000 ($72,000) at an auction at Sotheby's—"Christ and the Woman of Canaan," an 8-by-11 1/2 inch pen and ink drawing. It sold in less than a minute after an opening bid of £10,000 ($24,000).

The Bavarian State Opera in Munich has two new productions scheduled for December. On the 12th in the Cuvillies Theater it will mount "Aucassin and Nicolette" by the contemporary composer Günter Bialas, conducted by Matthias Kuntzsch, staged by Dieter Haugk and designed by Günter Schneider-Siemssen. On the 30th, in the National Theater, Heinrich Hollreiser will conduct Johann Strauss's "Die Fledermaus," staged by Michael Hampe with decors by Rudolf Heinrich.

* * *

Two productions of the Hamburg State Opera will be seen in color on North German Television in December. On Dec. 7, the presentation will be Menotti's "Help, Help the Globolinks," and on Dec. 21, Lortzing's "Zar und Zimmermann."

* * *

A program of dances and songs of African heritage—including North American and Antilles — will be presented Dec. 12, 13 and 14 at the American Center for Students and Artists in Paris.

## ...arings Open in Congress ... U.S. Use of Swiss Banks

...NGTON, Dec. 4 (Special).—...use Banking Committee ...arings today on curbing ...al use of secret for... ...k accounts, an attack ... part on a multimillion-...indle of the Navy—one ...iggest fraud cases ever ...y federal authorities. ...se involved a St. Louis ... and several of its of... ...o defrauded the Navy ... than $47 million in con... ...r rocket launchers and ... more than $4 million in overcharges and kickbacks into secret Swiss bank accounts.

In gaining evidence that led to a 30-count indictment, the Justice Department was able—for the first time—to crack Swiss bank secrecy.

Although the banks exert great political influence in Switzerland, the federal government and cantonal prosecutors intervened and brought court action that forced the banks to surrender the records to the Justice Department. In return, the United States promised not to use the documents for tax and related prosecutions.

The principal defendants included Francis N. Rosenbaum, a Washington lawyer with good social and political connections, and Andrew L. Stone, a multimillionaire St. Louis businessman. Both pleaded guilty to several counts of the indictment.

With the other defendants, they are due for sentencing here next month. Both men could be sentenced to 45 years in jail and fined $90,000.

Records in the rocket-launcher case disclose:

The conspiracy ran from January 1963 to February 1967.

When it began, Chromcraft Corp. of St. Louis had been receiving Navy contracts to manufacture rocket launchers. In 1963, Rosenbaum was a director of and special counsel to Chromcraft. Stone was the principal stockholder and chief executive officer.

They submitted cost estimates to the Navy for the rocket launchers, including invoices from a subcontractor. The invoices were fraudulent and the Navy over-paid on the contracts for the launchers. The subcontractor was nothing more than a desk drawer company and never did any work for Chromcraft.

In 1966, Chromcraft was merged into Alsco Inc., an Akron, Ohio, firm. Chromcraft's St. Louis rocket launcher manufacturing operation became the Techfab division of Alsco. Rosenbaum and Stone retained with Alsco the positions they had held with Chromcraft, and the false pricing and overpayments by the Navy continued until 1967.

In addition, Stone and Rosenbaum demanded and received kickbacks totaling $663,481 from Western Molded Fibre Products of Gardena, Calif., a legitimate subcontractor for the firm.

The defendants channeled this money and some $3.4 million of Navy Department overpayments into their Swiss bank accounts.

Investigators found, according to a report in the New York Times, that fictitious invoices are a standard service that Swiss banks, for a commission, offer clients and that the invoices in the case were, indeed, from Swiss organizations.

## Fed: An Independent Under Fire

By H. Erich Heinemann

NEW YORK, Dec. 4 (NYT).—The Federal Reserve System, in the view of prominent bankers, now faces one of the most serious challenges in its 55-year history—to preserve the gains already made in the battle against inflation, yet avoid tipping the economy into a serious recession.

Put in the simplest terms, bankers believe, the Fed cannot afford another failure if it wishes to preserve the independence from political control that it has traditionally enjoyed.

Many leading economists are now convinced that twice in the last three years—in 1966-67 and in mid-1968—the money managers acted prematurely in easing credit, with the result that the nation now has the worst inflation since the period immediately after World War II and the highest interest rates in its history.

But at the same time, the Fed's tight-money policy this year has driven the credit markets close to the point of collapse and well beyond the point where a broad range of essential social investment has been threatened.

**Social Ramifications of Issue**

Schools, mass transit facilities, pollution control and, above all, housing have to be financed in part at least through borrowing. And such borrowing has become not only inordinately expensive but also, in an increasing number of cases, simply impossible.

There are already tentative signs that credit policy is slightly less restrictive than was characteristic earlier in the fall. The monetary base, for example, which largely determines the behavior of the nation's money supply, has resumed a modest rate of expansion.

But this change—if it in fact represents a conscious decision by the Fed—almost certainly is the result of action that was taken many weeks ago and remained undetected until this time.

As most of the money managers appear to view it, the evidence of a "slowdown" in the economy now seems to be completely convincing or, as one economist put it recently, "overwhelming."

But it is less clear to them that the economy has passed a "cyclical turning point," where the downturn would begin to feed on itself.

The Fed tends to view the slowdown—the drop in industrial production, the slower rate of growth in personal income, the increase in unemployment, the sharp drop in the rate of gain in the physical volume of total output and so on—as a grudging response on the part of business to official restraint.

According to this view, there are still long lines of waiting borrowers in the marketplace (municipal, corporate and individual) who would eagerly step up to take any funds that were made available.

The implication of this analysis is that, while official restraint is beginning to have its effect on the volume of business being done, the expectation of inflation is still strong.

Were such expectations to be reinforced through significantly easier money, this could quickly undo the painful progress that has so far been made—especially so, some central bankers point out, at a time when the federal budget is threatening to move back into deficit.

Thus, the impression that emerges from conversations with informed officials is one of a continued commitment to monetary restraint. The danger of serious recession, which would bring sharply higher unemployment in the urban ghettos, still seems remote to them.

At the same time, the Fed does appear to have been impressed—and seriously concerned—with the extent of the demoralization in the credit markets that has been evident in recent weeks.

So, on balance, the money managers may be slightly more accommodating in the weeks to come—and slightly less eager to put further pressure on money center institutions—as they wait for new battle reports in the war against inflation.

## Lapin's Suit Names Nixon And Romney

### Fanny May Definition Comes Under Question

(Continued from Page 1)

need to keep Dick Hanna working on the problems of the housing and home finance industry," Mr. Lapin's letter began. It ended with an appeal for $100 from each recipient of the letter.

Reached at Fanny May headquarters here, where he went to work despite his dismissal, Mr. Lapin said it was true he had sent the letter and added: "There is a very good explanation for it, but I'd rather not go into it today."

In a second development, sources in the Nixon administration who asked not to be identified began giving their side of the case.

The gist of administration statements, which Mr. Lapin denied, was that he had not cooperated with Mr. Romney and that from time to time he had taken initiatives in the mortgage field without consulting Mr. Romney.

The letter that Mr. Lapin had written to potential political contributors, which was reportedly mailed in Fanny May envelopes, was thought to be one of the reasons why housing agency officials thought the President had good cause to fire him.

Political solicitations by federal employees are forbidden under the Hatch Act, but there is some question as to whether Fanny May is any longer a federal agency. Congress ruled last year that the agency, which had operated as a subsidiary of the Department of Housing and Urban Development, be converted into a private corporation with loose ties to the housing agency but controlled in fact by private stockholders.

Fanny May is now in a transitional period. Its actual conversion into a private corporation will take place when the board of directors determines that one-third of its outstanding stock is held by builders, real estate companies, and other mortgage-related institutions.

During the transitional period, Mr. Nixon can fire Fanny May's president—if he can establish "good cause"—and hire a successor. But when Fanny May passes to private control, its president will be selected by the 15-member board of directors, two-thirds of whom will in turn be chosen by the stockholders.

Any man selected by Mr. Nixon now to replace Mr. Lapin would inevitably have greater leverage than any other candidate when the shareholders meet, probably next spring.

In Mr. Lapin's view, Mr. Nixon is trying to get rid of him now and quickly install a successor so that the new man would have the advantages of incumbency. For their part, administration officials said today that Mr. Lapin was trying to "hang on to his job" for precisely the same reasons.

## Late Rally Sparks Rise In Stock Prices, Volume

By Vartanig G. Vartan

NEW YORK, Dec. 4 (NYT).—Prices on the New York Stock Exchange snapped back today with a brisk rally, particularly in the final hour of trading, after having dropped yesterday to the lowest levels in nearly three years.

Wall Street analysts, noting that the market had become "over-sold" during its recent sharp decline, described the rally as technical in nature.

"The turn-around in the afternoon," one broker declared, "restored a little sanity to the market."

The Dow Jones industrial average finished with a flourish as the tape ran two minutes late at the closing bell and stocks showed their best prices of a nervous session.

With a gain of 3.17, the blue-chip indicator ended at 796.53.

**Morning Woes**

At 11 a.m., the lowest level of the day, it was a different story. The Dow then hovered at 787.55, down 5.81 from the previous close, and NYSE declines outpaced advances by a four-to-one margin.

When one customer called his broker shortly before noon, the broker said, "Send me some flowers."

The rally came on the heels of a tumbling market. Yesterday, the Dow industrials broke decisively through the long-standing 800 level and closed at 793.36—down a whopping 175 from this year's high of 968.85 on May 14.

The breakthrough of a barrier that had been both technical and psychological brought further selling into the market. But by the middle of today's session the emotional selling had begun to ebb and prices took on a better tone.

**Glamours Lead**

Glamour issues—in textbook fashion—led the afternoon rally. This sector was buoyed in part by covering of some short positions by traders.

At the close, University Computing was 8 5.8 higher at 100 5/8. Earlier, it had sold at 91 1/8.

Natomas rose 4 7/8 at 70 5/8. Itek gained 3 5.8 at 64 1/2. Electronic Memories added 5 3/4 at 81. IBM finished 1 7/8 higher at 357.

Steadily narrowing the gap, the number of advancing issues increased during the afternoon. At the close, the Big Board showed 651 advances and 726 declines.

The roster of new yearly lows—316 stocks—indicated the extent of the market's morning weakness. There were four new highs.

Nine of the 15 most active issues ended with gains. American Telephone, easing 1/8 to 50 3/8, was the most heavily traded issue. Throughout the session, Telephone did not dip below its 1969 low of 50 and this was a factor in helping to turn the general market around.

Several recently depressed blue chip issues joined in the advance. General Electric gained 1 3/4 to 79 7/8.

*Redefining Charter Flights*

## Air Canada Challenges IATA Fares Pact

By Paul E. Steiger

LOS ANGELES, Dec. 4.—If airline executives are chewing their fingernails off at the knuckle in Caracas this week, part of the blame can be traced to a 44-year-old Quebec lawyer who just last year was named chairman and chief executive of Air Canada.

His name is Yves Pratte, and he has thus far been standing by his plan which he hopes will reduce the drain on Air Canada's revenue from supplemental, or charter, airlines.

Meanwhile, however, his colleagues in the International Air Transport Association, the rate-making body or international, scheduled airlines now meeting in the Venezuelan capital, have been trying to talk him out of it. They fear Mr. Pratte's plan could smash the hard-won agreement they hammered out last week to return order to international air fares.

Mr. Pratte's plan is to offer discount fares to charter passengers on transatlantic flights operated by Air Canada—without requiring that the passengers belong to any common group.

U.S. airlines, in particular, fear that such abrogation of the "affinity" rule by Air Canada—the largest airline in the world outside the United States and the Soviet Union—would cause U.S. transatlantic passengers to fly to Canada and thence to Europe to take advantage of the fares.

U.S. scheduled lines have defended the affinity rule, which is imposed by the Civil Aeronautics Board on scheduled and non-scheduled carriers alike, because without it, the non-scheduled charter operators could no doubt attract even more traffic.

But as Mr. Pratte explained here in an interview, his plan envisions maintaining the affinity rule on the non-scheduled carriers.

Through the end of August, 57 percent of Canadian transatlantic traffic this year went by charter flights, nearly all of them operated by supplemental airlines, Mr. Pratte said. This compares with about 34 percent the year before.

If this trend continues, Mr. Pratte said, the scheduled lines could be wiped out.

In any event, Air Canada has taken the position that it will not allow IATA to stand in the way of its plan, and is negotiating separately with the individual nations involved for the necessary approvals.

If the other IATA carriers do try to block the plan, Air Canada could retaliate, under the association's rules, by vetoing the new agreement on fares. This would bring a return to the open fare situation that has prevailed since October.

## G&W Profits Show Drop

NEW YORK, Dec. 4 (Special).—Gulf & Western Industries today reported that its net income in the first quarter ended Oct. 31 fell 36 percent while sales rose 6.4 percent.

The figures show that sales climbed to $389.8 million from $366.6 million in the year-ago quarter. But income in the latest period totaled $15.86 million, down from $24.89 million.

On a fully diluted per share basis, income slipped to 71 cents from $1.11 in the 1968 quarter.

The company said this year it realized gains from sales of marketable securities of approximately $31 million. But this was substantially offset by a provision to reduce the carrying value of its securities portfolio from cost price to market price. This reduced the gain for the quarter to $134,000.

## GE Introduces Large Computer

NEW YORK, Dec. 4 (Reuters).—General Electric Co. today introduced a computer in what it termed a "bid for the top half of the large-scale computer market."

The new computer, GE-655, will lease for $80,000 a month and sell for $3.2 million, at minimum configuration.

GE said the 655 operates at a speed of more than 1 million instructions a second.

Mr. Vanderslice said the firm has already received orders for the 655 and that first shipments will be made in the fourth quarter of 1970.

## Securities Industry Shifts Emphasis to Larger Sales

By Terry Robards

NEW YORK, Dec. 4 (NYT).—A major revision in the securities industry's system of compensation is taking shape and it probably will have a significant impact on brokerage-house profits.

Many of the industry's largest houses are taking steps to reduce the payout to their registered representatives, or salesmen. At the same time, they are trying to upgrade the quality of their business by making it attractive for their salesmen to concentrate on big-ticket sales.

Shearson, Hammill and Co., a large member of the New York Stock Exchange and other major exchanges, has informed its national sales staff that it would implement a new overall compensation program Jan. 1.

Other major brokerage houses are actively studying similar programs.

Such a move would have the effect of encouraging salesmen to concentrate on large transactions, because they would be penalized for the more numerous small transactions that are often unprofitable for the firm.

Alger B. Chapman jr., executive vice-president of Shearson, said: "The best way to characterize the new system overall is to say that, instead of paying for just straight volume, we are paying for the quality of the business. We weren't paying on the basis of ticket size before."

Shearson's new base rate for salesmen will be 30 percent of the total commission ticket, but the amount will vary according to the location of the branch office and the size of the ticket. Previously, salesmen averaged 37.5 percent of gross commission dollars.

He said the firm also was raising from $7.50 to $12 the size of the ticket on which the firm would pay no commission to the salesmen. This means transactions with gross commissions of less than $12 would result in no payout to salesmen.

## Xerox Gets 51% Vote in U.K. Unit

NEW YORK, Dec. 4 (UPI).—Xerox Corp. announced today it has agreed to buy voting control—51 percent—of Rank Xerox Ltd., and to grant the British firm rights to make and sell the line of computer equipment Xerox acquired when it bought Scientific Data Systems.

At the same time, Xerox bought back the royalty rights the British firm acquired some years ago to the sale of Xerographic products in Latin America.

The total consideration to be paid to Rank Xerox by the U.S. firm in securities is about $22,583,000.

In the future, Rank Xerox will pay Xerox royalties of 8 percent on any products it sells or leases that were developed by Xerox.

## ...rmany Acts to Limit Capital Export Role

...lyde H. Farnsworth

..., Dec. 4 (NYT).—West ...'s central bank took an ...t restrictive step today, ... that Germany can no ... the world's principal ex... capital.

The Bundesbank today increased what the Lombard rate—the charge for loans made on the collateral of securities—from 7 1/2 to 9 percent.

The spread between this rate and the bank rate has now widened to an unprecedented three points.

Frankfurt banking sources said the action means the central bank has opted for a "definitely restrictive" policy.

There had been rumors that the bank rate itself might be raised, but apparently political considerations weighed against this step at this time, a Frankfurt economist said.

While German monetary policies are changing, there has been no let-up in demand for German capital. In fact, the revaluation has tended to stimulate demand by doing away with the major risk of borrowing in marks.

The big German banks have already gotten the monetary message by voluntarily restricting their foreign bond flotations. Thus, there is now a queue of foreign corporate borrowers.

In the first ten months of this year, Bundesbank figures show, nearly $4 billion of private long-term capital was exported, a rate, banking sources said, that is absolutely impossible to maintain.

A committee of the German issuing houses has decided to work toward reducing overall foreign bond offerings to under $100 million a month. In November the figure was 530 million deutsche marks, or $190 million on the basis of the new parity.

Karl Blessing, Bundesbank president, said the bank's decision was valid for the month of December to assist commercial banks in meeting their end-of-the-year commitments.

He added that the Lombard rate increase comes into force Dec. 5.

The decision to reduce minimum reserve requirements was expected to free about $491 million held by member banks in reserve.

## Two Airlines Get Siberian Route

MOSCOW, Dec. 4 (AP).—The Soviet Union has granted Air France and British Overseas Airways Corp. authority to fly the shorter, less expensive trans-Siberian route from West Europe to Tokyo, a civil aviation official said today.

The only foreign carrier heretofore authorized to fly the much-sought route is Japan Air Lines.

Alexander Besedin, head of the foreign relations department of the Ministry of Civil Aviation, wrote in the weekly magazine New Times today that Air France will start using the route in April and BOAC in May.

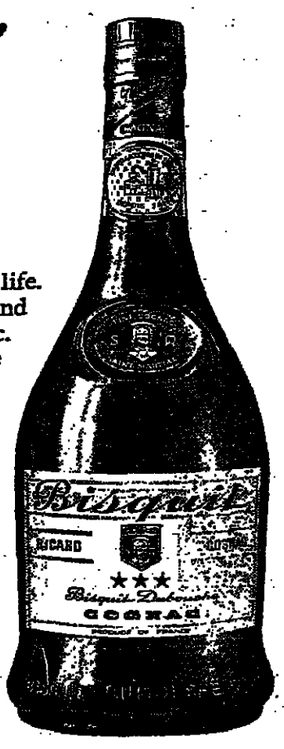

British and French diplomats, however, said they had not yet been informed of the decision.

The 100 Pipers Legend.

Our legend claims if you sip
a perfect Scotch you'll hear 100 pipers play.
That's a lot of Pipers. But then
100 Pipers is a lot of Scotch.

100 Pipers Scotch. From Seagram, Scotland.

100 Pipers Scotch Whisky. Bottled in Scotland. Created with the skill that has made Seagram the world's largest distiller.

**Value Line**

**Investment Survey on 1,300 stocks, 66 industries weekly**

**Here are some NOTEWORTHY items from the current week's edition on electrical and office equipment stocks:**

Cash-rich IBM feels no credit squeeze. Its working capital nearly doubled last year and it is able to provide credit to customers when they can no longer get it from other sources. Note, however, that IBM's earnings may dip in the current quarter. Page 916.

• • •

What happens to a consumer products company when a large portion of its sales force quits? See the recent sales and earnings record of Ronson Corp.; page 879.

• • •

Traffic-actuated control signals are the "in" device for handling heavy auto flows in complex, hourly shifting patterns. The Automatic Signal Division of LFE Corp. is a major beneficiary. Its bookings expanded 35% in 1968 and have registered comparable gains again this year. Page 861.

• • •

The demise of the "pooling of interests" accounting method, expected next year, will probably slow the income growth of ITT and many other conglomerates. Page 857.

• • •

Addressograph - Multigraph has halted output and deliveries of its new AMCD-II copier/duplicator to correct certain faults. This has enabled Xerox to postpone the introduction of a new generation of copier/duplicators without jeopardy to its competitive position and with decided advantage to its profits. Page 906.

• • •

For UARCO, a 25% earnings gain is estimated in fiscal 1970. This achievement is likely to stand out strikingly on a landscape of softening corporate profits. Page 923.

• • •

Spectacular profit recovery and subsequent growth have convinced executives of Burroughs Corp. that the lean dark days of the 1950's are gone for good. They plan $250 million of new capital investment during the next 5 years to expand manufacturing space by 50%. Page 910.

• • •

Singer Co. is aiming for second place in the copier industry, right behind Xerox. Page 887.

• • •

Electronic Memories & Magnetics is ingenious in programming internal earnings growth. New companies are formed to design and develop new concepts. When a given affiliate comes up with an item of commercial value, it is consolidated with the parent company. This keeps some research, development and start-up costs out of Memories' income statement. Page 839.

**Coming December 5th...**
**Value Line's new research reports on METALS/MINING/STEEL STOCKS**

METALS AND MINING: AlcanAlum, Alcoa, AMet Cl, Am Smelt, Am Zinc, Anacond, Benquet, Brush Beryll, Callah M, Camp RL, Cerro, CleveCliff, Cominco, CoppRng, CyprusM, DomeMin, FooteM, GranbyM, GtNoir, HandHar, Hanna Mng, Harv Al, HeclaMng, Hollingr, Homestke, HudsnB, Inspir Cop, Int Mng, Int Nickel, Kaiser Al, Kaweck Beri, Kennecott, McIntyr, Mesabit, Molybden, Newmnt, NY Hond, Pac Tin, PhelpsD, Reyn Met, RoanSel, StJosLd, Sunsh Mn, Unit Pk Min, US Smelt

For only $5 you can receive full-page reports on each of the 100 stocks listed above...plus the next three editions of reports covering about 300 other companies in these industries:

Machinery, Machine Tool, Soft Drink, Baking, Meat Packing, Food Processing, Milling & Vegetable Oil, Household Products, Grocery Store, Brewing, Investment Trust, Duo Fund Stocks, Apparel, Textile, Retail Store, Variety Store, Retail-Special Lines, Toys & School Supplies

To receive all 4 issues on the same schedule as our regular subscribers, fill out the coupon below and mail it to us with your $5 fee.

In fairness to regular subscribers, who pay $167 a year for the service (equivalent to $12.84 for 4 issues), this special low-rate trial fee of $5 is limited to those who have not had such a subscription within the past six months.

☐ FOUR-WEEK TRIAL (4 EDITIONS) Start my 4-week trial subscription to The Value Line Investment Survey with the Nov. 28th issue of full reports on 400 stocks. I enclose $5.
☐ ONE YEAR—$167 (52 EDITIONS)
☐ 3-MONTH TRIAL—$44 (13 EDITIONS)
Send me the complete service for the term checked plus—as a bonus—the 2-volume Investors Reference Library consisting of Value Line sections published during the 13 weeks preceding start of this subscription.
☐ Payment enclosed ☐ Bill me

If dissatisfied for any reason, I have up to 30 days to return the material for a full refund under your money-back guarantee.

COMPARATIVE SPECULATION

Analyses timing of a

**Breakaway Phase in the Pollution Fight**

**RESEARCH-COTTRELL**

saw its backlog—largely in air and water pollution control equipment—rise this year to twice 1968's gross sales. Competitor ZURN INDUSTRIES, which has expanded into noise-pollution abatement, began fiscal 1970 with a 30% growth rate against 7.9% for all of last year. With both stocks recently well below 1968 highs, does The Co-Ordinator's newest COMPARATIVE SPECULATION report anticipate price breakouts such as the latest move to new highs by pollution-oriented ECOLOGICAL SCIENCE? And how could prospects compare for a Canadian venture in refuse systems and noise abatement which went through a 1968-'69 slide from above $4 to below $2?

As a new client of THE CO-ORDINATOR — Canada's oldest weekly advisory service—you will receive periodic COMPARATIVE SPECULATION studies as a bonus, beginning with this new pollution report. Our introductory fee is $5 for five weeks of trial service.

CO-ORDINATOR REPORTS LTD.

**STATEMENT OF ACCUMULATED APPROPRIATIONS FOR LOSSES**
for the financial year ended October 31
(deductions in brackets)

| | 1969 | 1968 |
|---|---|---|
| Accumulated appropriations at beginning of year: | | |
| General | $ 73,180,963 | $ 54,549,296 |
| Tax paid | 6,579,683 | 2,197,561 |
| Total | 79,760,646 | 56,746,857 |
| Appropriation from current year's operations | 25,000,000 | 18,000,000 |
| Loss experience on loans less provision included in other operating expenses | 1,832,125 | 1,618,923 |
| Profits and losses on securities, including provisions to reduce securities other than those of Canada and provinces to values not exceeding market | (7,883,981) | 3,082,123 |
| Other profits, losses and non-recurring items, net | 66,803 | 312,743 |
| | 98,775,593 | 79,760,646 |
| Provision for income taxes | (13,200,000) | — |
| Accumulated appropriations at end of year: | | |
| General | 67,587,749 | 73,180,963 |
| Tax paid | 17,987,844 | 6,579,683 |
| Total | $ 85,575,593 | $ 79,760,646 |

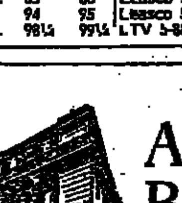

*Note: Due to a change in the Rules with respect to the prescribed maximum level of Accumulated General Appropriations for Losses allowable under income tax regulations for 1969 and subsequent years, it has been necessary to provide $13,200,000 for income taxes exigible on the appropriation of $25,000,000 out of earnings. Including the income tax provision shown in the Statement of Revenue and Expenses, income taxes for the year amount to $30,500,000.*

AMERICAN BANK NOTE COMPANY

PREFERRED DIVIDEND No. 255
COMMON DIVIDEND No. 245

A quarterly dividend of 75¢ per share (1½%) on the Preferred Stock for the quarter ending December 31, 1969 and a dividend of 25¢ per share on the Common Stock have been declared. Both dividends are payable January 1, 1970 to holders of record December 9, 1969. The stock transfer books will remain open.

LOUIS T. HINDENLANG
Vice President, Secretary and Treasurer

November 25, 1969

## BANK PRESIDENT

Leading financial institution has immediate plans to develop its Swiss banking operation. The position involves full responsibility for the development and operation of a complete banking complex. The desired person must be a Swiss national, with extensive experience, and must presently be the Senior Officer of a major bank. Salary and equity participation will be extremely high for the person with the type of experience required. All replies held in the strictest confidence.

BLONDIE

# BRIDGE — By Alan Truscott

South showed a strong hand by reversing with two spades after his partner had responded with one no-trump to the one-diamond opening. North's preference bid of three diamonds was something of an underbid, and South might have passed. He persevered, however, and reached the diamond game.

West's queen of diamonds was likely to take a trick, so he did not choose to try for a ruff. After West's club lead, South made a key play by playing low from dummy and ruffing in his hand.

As there are two unavoidable heart losers, it appears that South must guess brilliantly in trumps to make his contract. South could not see through the back of the cards so he played the ace and king of diamonds. When the queen did not fall, the spectators expected the contract to fail, but they were due for a surprise.

The declarer discarded a heart on the club ace and ruffed a club. He led a spade to dummy's queen, ruffed yet another club, and cashed his two spade tricks to reach this position:

NORTH
♠ —
♡ 74
◇ 3
♣ 9

WEST
♠ J
♡ 6
◇ Q
♣ K

EAST
♠ —
♡ AK109
◇ —
♣ —

SOUTH
♠ 10
♡ QJ
◇ J
♣ —

The spade ten was ruffed in dummy, and the club nine was ruffed in the closed hand to give South 11 tricks. The defenders still held the ace-king of hearts and the master trump, but could only take two tricks with them.

NORTH
♠ Q9
♡ 743
◇ K95
♣ A9875

| WEST (D) | EAST |
|---|---|
| ♠ J753 | ♠ 842 |

## *THE DIARY OF ANAIS NIN, 1939*

*By Anaïs Nin. Edited by Gunther Stuh Illustrated. Harcourt, Brace & World. $7.50.*

Reviewed by Phyllis Méras

SINCE 1914, literary Bohemian Anaïs Nin has been keeping a diary, and its pages now run into the hundreds of thousands. It has been compared with the self-revelations of St. Augustine, Abelard and Proust. It is certainly as self-revealing as the sins of the saint, but his *Confessions* presumably helped to save souls, and if they did not, were written with salvation of others in mind. Miss Nin's intensely feminine, long-suffering, ecstatic, impressionistic diary has, since the beginning, been largely in praise of Miss Nin.

The reader, therefore, must come to it with an attachment to her, as did Henry Miller, who made the comparison with St. Augustine, and who has been a devoted friend for decades always aided in hard times by Miss Nin with typewriters, money and moral support. "I considered Henry's work far more important than my own." Many would agree she was right.

In this third volume of her diary, Spanish-born Miss Nin tells of her return to America from Paris at the onset of World War II. New York, which she had known before as a child and a young woman assisting Dr. Otto Rank, the psychoanalyst, seemed an ugly, barren place for an artist. She had found it so before. If anything, it had grown more distasteful in her absence.

*Beauty is missing. Writing is flat and one-dimensional. Each political party outdoes itself in hurling low-brow insults and fanatical accusations.*

But others who felt homeless, too, began to gather in and around Miss Nin's Greenwich Village nest. There was still atmosphere there. Old Italians played chess in Washington Square. There were ginkgo trees and vegetable carts and cheese shops.

And one by one, old friends arrived from abroad—Henry Miller; Gonzalo, Miss Nin's black-haired, left-wing Peruvian admirer. And there were newcomers aplenty to join her menage—Robert Duncan, the poet, was among them, and he was a diarist, too, with whom she shared diary thoughts. "This is his portrait of me," she writes:

*She is a very delicate woman, you know; sharp, she has such tiny bones and eyes that would break, I am sure, and she moves sideways through glass. Can you guess when she washes them, her eyes, where she dries them, fox, princess, daughter? And her feet—nails of isinglass, brittle...*

Miss Nin met the Dalis, Kay Boyle; the actress Luise Rainer, then married to playwright Clifford Odets. "Dali liked me," she writes. "He showed me his work." Mrs. Dali, on the other hand, was "on her guard against me."

Kenneth Patchen wa on Miss Nin by Henry She found him unbe brooding, inert, sluggi eyes that were soft, most people she met, continually in need of

Through this vo through the earlier ce Nin describes in detail gesses to the less forta ceaselessly bemoans her and the way she is upon. "All that I neede away. For years I did have a fountain pen. B had one and Gonzalo records, but they did was alone, I ate badly money."

In the 1940s, Miss covered black society attitudes toward the Ne knew, while perhaps their time, are woefu and condescending to vited to a party at Can she gloats over the act grew jealous of his a to her and left the pi met Richard Wright a that he had "finely hands." Overwhelmed meeting with a handfu tians, she writes, "I Haitians into my life my diary as one places flowers in a book, my soaming anew because

Miss Nin has been superb stylist. She sa ever it may mean— writes as a poet in a f of prose. This suggests does not understand ti is more than fancied Prose or poetry, what suffers from preciosity notonous rhythms.

*What I have to fragile as snow, but as the deluge. Shall I voice of tomorrow? S the power of my feeli will inundate and wat ment and concrete cli morrow with the nec cundating water, amn the fluid of tears, the of feeling?*

There is no denyin literary and artistic who people her diary cinating crew. One greater insights into either Miss Nin or Gunther Stuhlmann, willing to divulge. C because of its length libel laws, is necessari it is, she darts about d brushing by all but swiftly and too supe her overwhelming cor her own feminine ps

Miss Nin, if not with already establish tion, is a taste that ta deal of acquiring.

*Phyllis Méras is a re tributor to "Book Wo ary supplement of T ington Post.*

The Braves have been a muscular team at bat but a lean one on the mound and Nash—who was the rookie of the year in the American League in 1968—could become one of their frontline starting pitchers.

**Expos Get Sparma**

The Montreal Expos, in a straight swap of pitchers, sent Jerry Robertson to the Detroit Tigers for Joe Sparma, the former quarterback at Ohio State who has been one of the fastest—and wildest—pitchers in the American League for five years.

Earlier, the Braves and Expos did some business with each other. Larry Jaster, the left-handed pitcher who was a member of the pennant-winning St. Louis Cardinals in 1967 and 1968, was traded by the Expos (who got him in the expansion draft) to Atlanta for Jim Britton, a right-handed pitcher, and Don Johnson, a minor-league catcher. Jaster had a 1-6 won-lost record at Montreal. Britton was 7-5 at Atlanta.

The Mets were able to "stabilize" third base for 1970 because they finally were convinced that Tommie Agee had stabilized center field in 1969. That is, until Agee had established himself, they were reluctant to part with Otis—a versatile 22-year-ago rookie who could play center field better than third base.

In 1965, Foy was voted the rookie of the year as well as the most valuable player in the International League. Then he was promoted from Toronto to the Boston Red Sox, for whom he played third base while dabbling as a catcher and first baseman. Last year, he was drafted by the new Kansas City team, played 124 games at third base and also filled in 24 times as a shortstop, second baseman and center fielder.

He batted .262, hit 11 home runs, led the Royals with 71 runs batted in and stole 37 bases in 52 attempts, making him the fifth-ranking thief in the league.

The third man in the trade, Johnson, is a right-handed pitcher who spent most of the summer at Memphis in the Texas League before making two brief appearances with the Mets in September. He won 13 games and lost 13 for Memphis.

In the Atlanta-Oakland exchange, the Braves were gambling on Nash's return to full strength after a season of arm trouble. He is only 24 years old and became one of the Athletics' bright young pitchers in 1966, when he won 12 times and lost only once. This year he won eight games and lost eight, but pitched only 115 innings. Felipe Alou is a 34-year-old outfielder, the oldest of the three Alou brothers in baseball, and he has a .290 career batting average. He hit .282 in 1969.

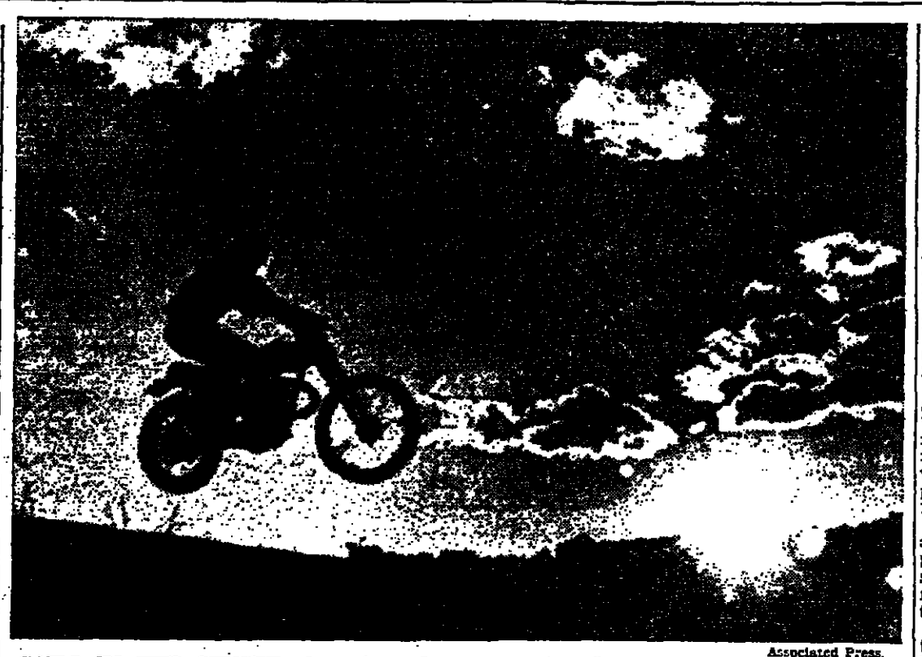

In a separate transaction, the Mets sold five minor leaguers to Kansas City. They were Richard Beck, Alan Schmelz and Bill Hepler, pitchers; Mike Minster, a catcher and infielder, and Steve McMillan, an infielder who is a cousin of the Mets' former shortstop, Roy McMillan.

The Mets also made a trade at the minor-league level, sending Bernie Smith, an outfielder from Tidewater, to Seattle for Gary Upton, a catcher who played at Vancouver and will be on the Tidewater roster.

Danny Osinski, a 36-year-old relief pitcher who had a 5-5 record with the Chicago White Sox last season, was sold from the Tucson roster to Oklahoma City, a Houston affiliate.

### Wisconsin Coach Fired

MADISON, Wisc., Dec. 4 (UPI).—John Coatta has been dismissed as head football coach at the University of Wisconsin. Elroy Hirsch, the director of athletics, said a search would begin immediately for a successor.

Associated Press.

SAILS IN THE SUNSET—A motorcycle racer outlined against a Colorado sunset.

## Big O's 36 Points Place Him 3d in NBA, But Are 2 Shy

NEW YORK, Dec. 4 (AP).—Oscar Robertson scored 36 points and moved into the third spot in National Basketball Association annals last night but the Big O's heroics were in vain as the Seattle Supersonics downed the Cincinnati Royals, 118-117.

Robertson, who has now scored 20,881 career points, moved ahead of Bob Petit, former St. Louis Hawk star. Petit had 20,880 points. Wilt Chamberlin and Los Angeles teammate Elgin Baylor remain 1, 2 on the list.

The Big O led a futile final period charge as the Royals gained a 112-112 tie. But a pair of free throws by Seattle's Bob Boozer gave the Sonics a 118-115 lead and a basket at the buzzer by Tom Van Arsdale was not enough.

**Celtics 113, Bullets 105**

Boston got 31 points from Larry Siegfried and 27 from John Havlicek and opened up an 18-point lead before intermission and hung on for a 113-105 victory over Baltimore.

**Rockets 146, Bulls 131**

Don Kojis hit on 17 of 19 shots from the field and wound up with 40 points as San Diego defeated Chicago 146-131.

**Pistons 106, Warriors 102**

Howie Komives hit four foul shots in the final minutes to give Detroit a 106-102 victory at San Francisco. Komives hit two free throws with 1:16 left to put Detroit ahead, 102-98, and clinched the triumph with two more with 20 seconds left.

## *Notre Dame Nips Michigan Five, 87-86*

NEW YORK, Dec. 4 (AP).—Notre Dame, looming as a strong contender for the national collegiate basketball championship this season, wiped out a 12-point deficit in the second half to score an 87-86 victory over Michigan last night. It was the second straight victory of coach Johnny Dee's quintet over a Big Ten team. The Irish beat Minnesota, 84-75, Monday.

The Irish compiled a 20-7 record last season, but were beaten by Miami of Ohio in the first round of the NCAA championship tourney last March.

Sid Catlett, hampered by an ankle injury and who was not expected to play, came off the bench in the second half and sparked the 13th-ranked Irish to their triumph at South Bend.

Catlett scored only 6 points, but he grabbed five rebounds and blocked two key shots. His work backed up the shooting of Austin Carr, who scored 37 points.

**Davidson Wins**

Davidson, No. 5 in the preseason Associated Press poll, rolled over Furman, 109-90; North Carolina, No. 7, smashed Mercer, 100-52; and Colorado, No. 10, crushed the University of California, at Irvine, 80-65. St Bonaventure, No. 17 and the only other team in the top twenty to play, humbled Detroit College, 106-54.

Mike Malloy scored 21 points as Davidson won its 50th straight on its home court and successfully launched Terry Holland's coaching era. Soph Bill Chamberlin led North Carolina with 18 points while Cliff Meely paced Colorado with 27. Big Bob Lanier tallied 36 points to lead the Bonnies in their easy triumph.

Jim McMillan scored 27 points to help Columbia come from behind and down Northwestern, 83-68, in the opener of a double-header at Chicago. Ken Johnson's 35 points led Indiana over Chicago Loyola, 100-95, in the second game. La Salle beat Albright, 95-59, and St. Joseph's humbled Hofstra, 98-57, in a Philadelphia twin bill. Colgate beat Cornell for the first time in nine years, 78-76.

Boston 113 (Siegfried 31, Havlicek 27), Baltimore 105 (Johnson 26, Monroe 20).
Seattle 118 (Rule 38, Wilkens 23), Cincinnati 117 (Robertson 36, Van Arsdale 23).
Detroit 106 (Miles 29, Walker 22), San Francisco 102 (Mullins 31, Thurmond 20).
San Diego 146 (Kojis 40, Hayes 30), Chicago 131 (Haskins 21, Love 26).

## *Kojis Demands To Be Traded*

SAN DIEGO, Dec. 4 (AP).—Don Kojis of the San Diego Rockets has asked to be traded. General manager Pete Newell said: "We must get like value in return."

Kojis, a six-year veteran of the National Basketball Association, reportedly has been asking for a raise to match salaries of other top forwards in the league.

There also have been recurring reports of disagreement between him and Elvin Hayes, the Rockets' star center, whose salary is said to be three times the $35,000 paid Kojis.

## Liston Is 12-5 To Beat Martin

LAS VEGAS, Nev., Dec. 4 (UPI).—The odds favoring former world heavyweight champion Sonny Liston in his 12-round North American title fight against Leotis Martin of Philadelphia were down to 12-5 today.

Liston, who lost his world title to Cassius Clay in 1964, previously was listed as a 13-5 favorite for the Saturday bout. Liston has won 15 straight fights, 14 by knockout, since having failed to win back his crown from Clay in 1965.

The winner of the fight here will be recognized as the official and first heavyweight champion of the North American Boxing Federation, its president, Bill Houston, said.

"We want to emphasize," said Houston, "that this is a recognition as the North American champion and not the world's champion."

The NABF represents eight states and Mexico.

*But Minister Indicates No*

# South African Players Back Ashe's Visa Bid

JOHANNESBURG, Dec. 4 (NYT).—South African tennis players have made a concerted appeal that Arthur Ashe, the American negro player, be allowed to compete in the South African national championships next year.

Some tennis officials fear that the government will react by refusing Ashe a visa.

[In Pretoria, the Minister of Sport and Recreation, Frank Waring, declared Wednesday night it was obvious Ashe did not intend to come to South Africa to play tennis but to engage in political activity, United Press International reported.

[The minister quoted several anti-South African statements reportedly made by Ashe which, he said, showed "an outright unfriendly and threatening attitude to South Africa."

[Waring's statement indicated the South African government will be unsympathetic toward Ashe if he applies for a visa.]

"We spoke up because we felt it was right," Cliff Drysdale said yesterday. He acted as spokesman for the newly formed Players' Union, which appealed to the South African Lawn Tennis Union to accept the American's entry.

**No Disruptions**

"We would not try to disrupt the championships or embarrass anyone, but the eventual outcome of barring Ashe could be catastrophic for South African tennis," Drysdale said.

Virtually all leading tennis players in South Africa support the stand on Ashe, Drysdale asserted.

Caution on the players' appeal was reflected in a statement by the chairman of the Players' Union, Allan Shwarz, who said its sole purpose was to promote the interests of amateur and professional tennis "and not to agitate on political matters."

Many officials and players believe that there is only a slight chance of Ashe's being granted a visa. The championships will be played on the eve of the general election in April.

There is also a feeling among the players that South Africa may be forced out of Davis Cup play. Permission for Ashe to come here, it was said, would create tremendous goodwill and would counterpart anti-apartheid demonstrators.

The golfer Gary Player, who supports the policy of separate development of the races, maintains that the participation of Ashe and other nonwhites in South African sport does not affect the government policy.

## Penguins Beat Wings With Clean Living

NEW YORK, Dec. 4 (AP).—The Pittsburgh Penguins were on their best behavior last night and were rewarded with a share of second place in the National Hockey League's West Division.

The Penguins, without having a penalty called against them, skated to a 2-1 triumph over Detroit, their fourth straight game without a loss. Pittsburgh, getting first-period goals from veteran Dean Prentice and 20-year-old rookie Michel Briere, moved into a tie with the Minnesota Flyers.

**Blues 3, Seals 1**

Division leader St. Louis scored a 3-1 victory over Oakland. The Blues' victory extended its skein to ten straight over the Seals and an overall mark this season of 8-0 versus West Division clubs.

**Flyers 5, Maple Leafs 5**

Minnesota dropped into a second-place tie with the Penguins with a 5-5 tie against Toronto. The Flyers gained the deadlock on a goal by Ray Cullen, his third of the night. Toronto had gone ahead 5-4, on a tally by Ron Ellis only 2:05 before Cullen's goal at 15:39.

**Black Hawks 3, Rangers 3**

Bobby Hull scored one goal and assisted on the third by Chico Maki, which earned Chicago a 3-3 deadlock with New York. The Rangers did all their scoring late in the second period, scoring within 2:36 minutes on goals by Vic Hadfield, Bill Fairbairn and Jean Ratelle. It was the Rangers' 13th game without a loss.

**Flyers 7, Kings 1**

Los Angeles scored first in the opening period, but Philadelphia got two first-period goals from Jim Johnson, who added another in the third period for a hat trick, in the Flyers' 7-1 rout. It was the tenth King defeat in 12 games.

Philadelphia 7 (Johnson 3, Nolet 2, Clarke, Heiskala), Los Angeles 1 (Hextall).
New York 3 (Hadfield, Fairbairn, Ratelle), Chicago 3 (R. Hull, D. Hull, Maki).
St. Louis 3 (Goyette, Berenson, St. Marseille), Oakland 1 (Hampson).
Pittsburgh 2 (Prentice, Briere), Detroit 1 (Mahovlich).
Toronto 5 (Keon 2, Ellis, Ullman, Dorey), Minnesota 5 (Cullen 3, Larose, Grant).

## *The Scoreboard*

SOCCER—At Marseilles, France, Czechoslovakia went into the final 16 for next year's World Cup finals in Mexico with a 4-1 victory over Hungary in a Group 2 playoff. The Czechoslovaks became the 14th team to qualify for Mexico, joining cup holders England, hosts Mexico, and Romania, Italy, Soviet Union, Sweden, Belgium, West Germany, Peru, Brazil, El Salvador, Uruguay and Morocco. Bulgaria is almost certain to be the final European qualifier, unless it fails to beat winless Luxembourg at home next Sunday, in which case a Group 8 playoff against Poland will be necessary.

At Tel Aviv, forward Gloria Spiegel scored the goal in Israel's 1-0 victory over Australia in the first leg of their Group 15 World Cup qualifying match. Israel now needs only to draw the return match in Sydney on Dec. 14 to qualify for Mexico.

At Madrid, Real Madrid, six times European Cup winners, crashed out of the competition, beaten 4-3 on aggregate by Standard Liege of Belgium. Standard, 1-0 winners of the first leg, triumphed again in the second leg of this second-round match, 3-2, in front of 85,000 stunned Spanish fans.

## *'The Most Explosive Team of All Time'*

### Big Noise by San Diego St.

By John Hall

...ANGELES, Dec. 4.—For ...me, the rumbles filter... ...o town from the South ...ouder and louder. The ... of unbelievable atroci... ...d general horror on the ...l field were constant. ...e is this hungry giant ... as Don Coryell and his ...ss army known as the ...iego State Aztecs. Just ... dying with a spear in ...est, a spy once made it ...o gasp out a last word ...Attila the Hun was no ...cool or cruel than the ... warrior prince, Dennis ...

... first warning of this ...ing evil arrived last ... It came as a bulletin ...the front, a news letter ...the Aztec Club. The proc... ...n began:

...r dominating the ...s so-called small college ...for the past three years, ...Coryell's Aztecs are mak... ...break for major status. ...re their chances?

...n. Since moving into ...n Diego Stadium two ...ago, the Aztecs have ...d 40,000 people a game.

**More Than Pros**

... In 1967, these Aztecs ... averaged more fans ...e San Diego Chargers.

... Last fall when San ...tate met Southern Mis... ... always one of the ... top defensive teams, ...s said the Aztecs would ...what it's REALLY like ... with the big boys. The ... of course, won that one, ...

... that was for 1969 open... ...e humble warning turned out to be an understatement.

Coryell's crushers began with a 49-0 execution of Cal State (Los Angeles), dismantled San Jose State by a 55-21 count, and, in one of their few admitted crucials, smashed Pacific, 58-32.

**'Most Explosive of All Time'**

By the time they won their eighth straight, a 70-21 squeaker over New Mexico State, the Aztecs had already been invited to a bowl—Saturday's upcoming Pasadena Bowl.

The Aztec Club bulletins thereby gained a little confidence.

"Item. College football waited for a full century to unveil the most explosive team of all time—the San Diego State Aztecs.

"Item. San Diego State is big in every way. It has a student body of more than 25,000. When the Aztecs played Pacific for the championship of the new Pacific Coast Athletic Assn., the crowd of 49,000 was the largest on the coast that day—larger than USC drew at home."

When the Pasadena Bowl committee obtained Boston U. as an opponent for San Diego, there was instant sympathy. At least three other schools earlier side-stepped invitations to the gas chamber.

The humane society immediately put Boston No. 1 on its list of crippled strays in need of aid and comfort.

So did Coryell. "We'd rather play someone like Florida State, Arizona State or Air Force. We have nothing to gain by playing this game ... a college division team ... that's just what we've been trying to get away from," grumbled the coach.

Besides their 48.3 point average on the field, the most impressive thing about the Aztecs, of course, is their modesty.

Naturally not satisfied with merely steamrolling the people on their schedule, they spent as much time belittling people everywhere. Quotes started turning up from Aztec heroes, who endlessly pointed out they had spurned offers from such as USC or UCLA or Notre Dame to choose San Diego's superior football program.

Shaw took to telling how he'd left a disinterested and wasteful USC after his freshman year to find paradise with Coryell.

Jack Murphy, the respected and able sports editor of the Union, viewed the local tidal wave calmly, explaining the Aztec desire for recognition has been stalled by lack of bravery by bigger names, accepting invitations to get on the San Diego schedule.

"This is Coryell's burden," observed Murphy. "Given an opportunity, he would play a doubleheader with USC and the Rams the same night. He has challenged Ohio State, Alabama —the world."

**Burns, Parks Steal Show**

By now, you can understand how it looked when Jim Stangeland took his Cal State (Long Beach) club down to San Diego last Saturday night to finish off the regular season. Hopeless.

But a strange thing happened as they started to drop the cyanide pellets. Long Beach more than proved King Kong to be human.

The two most exciting athletes on the field were not Aztecs. They were 49er running back Leon Burns, best pro prospect sighted this season, and wide receiver Billy Parks, a fantastic glue hand despite the fact he was making his first appearance after sitting out seven weeks with a broken collarbone.

Finally losing a 32-21 lead and succumbing in the closing minutes, 36-32, the 49ers still won everything but the final score.

This, really, is not meant to take anything away from San Diego. The Aztecs have a right to their pride. It was to their credit they were able to come back and rescue themselves for a 10-0 season.

San Diego's frustration is understandable. Too long overlooked, the Aztecs have won 47 of their last 48 and are perfect since 1967. In nine seasons, Coryell is 78-11-2.

Shaw is as brilliant a passing quarterback as has been advertised all along. He set an NCAA record with nine touchdown passes against New Mexico and another with a season total of 39.

But maybe we all don't have to feel sorry for Boston U. And perhaps the San Diego State Aztecs ("the most explosive team of all time") have learned to approach the future with a little more humility as well as compassion for its fellow powerhouses who have been innocently stealing the publicity.

## RED SMITH — *Crumbums*

Fourteen hundred people with a price on their heads slithered through the winter's first snowstorm the other night to graze together in recognition of Toots Shor's 40 years in New York.

The price was $100 a head, which seems slightly ridiculous when you consider that celebrating 40 years of Toots Shor is like celebrating a broken hip. Actually, the Crumbums came to salute themselves for survival.

Red Smith

The roster of Crumbums present—i.e., friends of the saloonkeeper—ranged from District Attorney Frank Hogan to former Chief Justice Earl Warren, from Bob Hope and Pat O'Brien to Joe E. Lewis and Gordon MacRae, from Horace Stoneham to Horace McMahon, from Johnny Rotz to Johnny Lujack.

Indeed, there's a former haberdasher out in Independence, Mo., who probably would have been there a few years ago when he was in his early 80s. As a senator and Vice-President, Harry Truman was a licensed Crumbum and he pouted a good deal when the Secret Service told him the off joint on 51st Street was off-limits for the President.

The improbable scope of Toots Shor's friendship flabbergasts people from narrower worlds. They don't understand that in 40 years in the saloon business it is impossible not to meet everybody, and Toots never forgets anyone. Years ago this fact was remarked on by Bill Veeck, the free spirit who used to operate baseball franchises the way Shor runs a bar—noisily.

"What I love about him," Veeck said, "he's no frontrunner. When I was a busher in Milwaukee, he was just as obnoxious to me as when I had the world champions. He's a foul-weather friend which is the worst kind."

A few hours after the Yankees mopped up the Phillies in the 1950 World Series, Toots sat chatting with a customer in the dining room when a waiter whispered that Joe Page had just come into the bar. Hastily, the proprietor excused himself and went out front. For three seasons and two World Series Page had been undisputed king of the Yankee bullpen, but 1950 had been a bad year for him and he was ignored during the Series. In no mood to attend the team's victory party, he had left the Stadium by himself.

Pretty soon the waiter came back smiling. "The boss gave him a hero's welcome," he said.

Bernard Shor is not necessarily better for people than whiskey. Not as good, he would say, and he would say it out of respect, not false modesty.

On Grantland Rice's 70th birthday, he was inexpressibly pleased to receive 70 red roses from Toots Shor. "Gee, that was thoughtful, Toots," a friend said. "Wish I'd thought of it."

The saloonkeeper made a brush-off gesture, backhanded. "Whiskey," he said. "That's all it takes—whiskey, and heart."

A few nights later there was a birthday party for Granny in the Coffee House, a quiet gathering of a dozen or so. After cocktails—Toots always remembered there was just one apiece—there was dinner at one long table. Then Eddie Rickenbacker got up and made a spread-eagle speech knocking labor. Roy Howard got up and damned the administration. Somebody else was clearing his throat when Toots bounced up.

"You creepy bums," he said with the Old World grace that has always distinguished him, "I thought this party was for Granny Rice." He walked around the table, bent and planted a kiss on the pate that Granny used to say looked like a half-picked cotton patch. "I love ya," Toots said, and resumed his seat. It was the closing address of the evening.

Toots Shor has had many fights but only two feuds—with Sherman Billingsley and a man in Philadelphia named Paul Harron.

"Hate," he said one night in Philosophy class. "is a word I don't use. I say dislike. One time my little girl Kerry was sick, in a coma. I prayed to God.

"I told God, if this little girl gets better, I'll never dislike anybody again as long as I live—except two guys."

He had to level.

## Observer

# The Crime Report

By Russell Baker

WASHINGTON.—Last Saturday a congregation of Seventh Day Adventists was held up by two gunmen during divine worship in church here. That's Washington these days. Not long ago two hoodlums with guns knocked over a classroom full of third-graders in one of the public schools.

The really surefire place to get caught in a stickup, however, is not at church or school but at a High's dairy store. High's operates a large chain of dairy stores in the Washington area, and a good thing, too, because without them half the holdup men in Washington would go to bed penniless and frustrated every night.

In most Washington houses, when the daily patrol assignments are handed out, the person who has to go to a High's dairy store and get the milk that day receives lingering handshakes from the men and kisses from the women before slipping into the cover of shrubbery.

Old Washington hands do not just stroll into a High's and pick up a gallon of milk, any more than they just stroll into the bank and start writing checks. No sir. Shopping at High's, one draws the car up in front of the store with the engine idling.

The trick is to wait until the stickup man walks in, cleans out the cash register and the customer, and dashes out. Within a few moments of his exit, the police will arrive. The time to buy the milk is when the police are still in the store.

* * *

This is typical of the many tricks the cunning city dweller uses in his daily joust with the holdup man. But what about the bank? Quite simple. Fortunately for all potential victims, the banks are competing with each other to see which one can build the most branch offices behind plate-glass windows on street corners.

This means that in the typical street intersection with four corners, three corners will be occupied by banks and the activity in each bank will be on full view through plate glass.

The trick is to open accounts in all three banks in the intersection. Since it is statistically impossible that holdup men will be heisting three banks at the same intersection simultaneously, one has merely to glance about until he discovers which bank is being robbed and duck into one of the other two to transact his business.

Even the canniest crime dodger doesn't get away every time, of course, and sometimes it can be poignant listening to family conversations at the end of the day when everyone has been safely double-locked in the house and the man-eating wolves have been hidden in the yews and the curare has been spread on the window stills.

"Everybody back safe?" someone calls.

"All except grandmother," another may reply. "She spent the day walking up and down Connecticut Avenue to decoy purse snatchers and got 17 with her gas gun. She has to testify in night court."

* * *

And what about the dear children? Did they have a good day in school?

"Two guys with automatics held up my mathematics class and escaped with my Graham-Cracker money," junior reports.

"Walking past the principal's office," says Dora, "I felt a sawed-off shotgun in my back and heard a voice say, 'Your gym clothes or your life.' After I surrendered the gym suit, he made his escape running south on the up staircase."

"Not bad, not bad at all," one of the elders is bound to observe. "Nobody mugged on any parking lots all day long."

Occasionally, someone may scream, and someone may ask, "What's auntie screaming about?"

"She got bit by the king cobra," someone may say.

And someone else: "I told you it was foolish to bring that king cobra in the house."

And someone else: "Maybe it was, but I'd pay a sight to see the look on some holdup man's face when he busts in here and steps on 14 feet of the meanest snake he ever saw in his life."

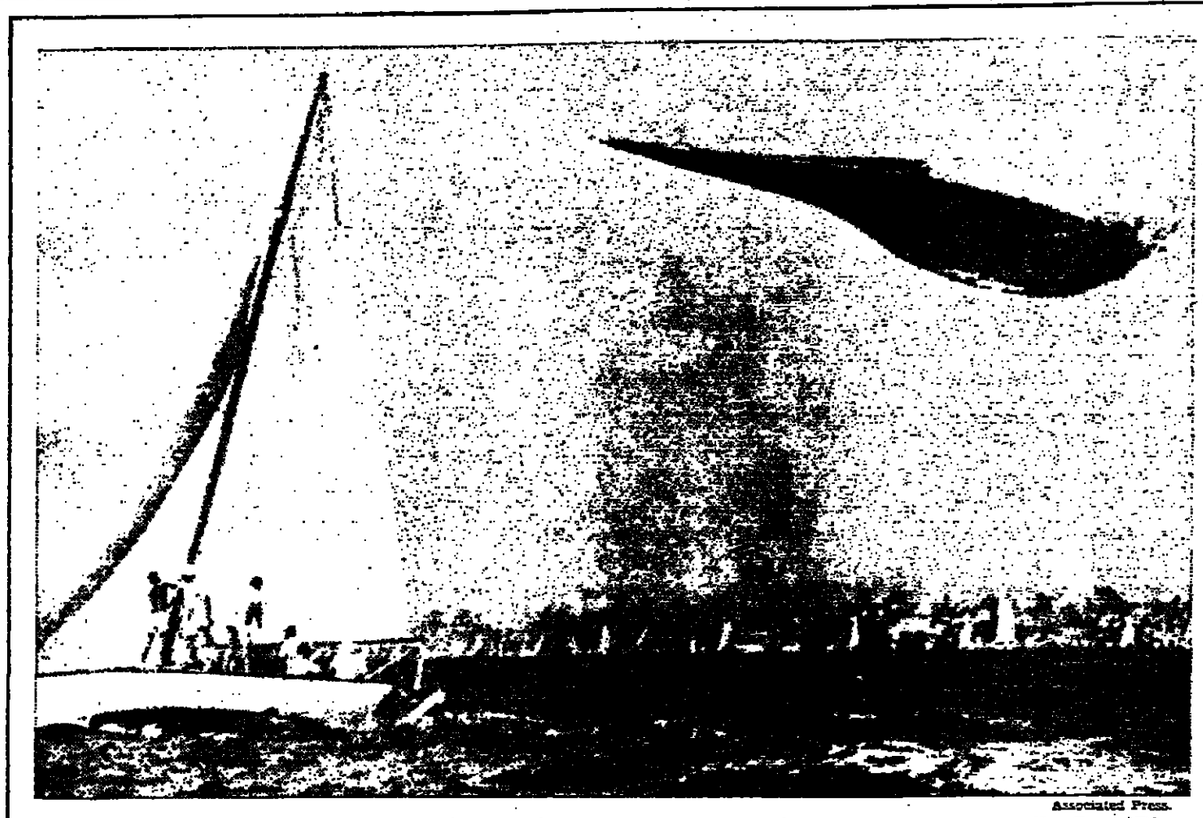

Tomorrow, of course, someone else must go to High's for the milk.

## 88 Nations to Take Part in Weekend Sale

PARIS, Dec. 4.—Eighty-eight countries will participate in the annual international sale ("Vente des Nations") this weekend at the Parc des Expositions, Porte de Versailles, Paris.

The sale is open Friday from 2:30 to 8 p.m., Saturday and Sunday from 11 a.m. to 8 p.m. and Monday from 11 a.m. to 7 p.m.

Proceeds from the sale will help to underwrite a series of international university meetings ("Rencontres Universitaires Internationales").

Associated Press.

**GONE WITH THE WIND**—There's nothing extraordinary about a flying jib, but who ever heard of a flying spinnaker? The crew of Ken Tregonning's yacht lost control of the sail during races on the Swan River in Perth, Australia. The spinnaker flew out to starboard as the yacht was running before the wind.

# A Bonaparte in the President's Cabinet

By Paul Treuthardt

PARIS, Dec. 4 (AP).—Move over, La Fayette. An illustrious but almost-forgotten Franco-American personality seeks room in the history books—the Bonaparte who twice held cabinet rank in Washington.

His story was retold this month in the august, semi-official French National Defense Review (Revue de Defense Nationale) by Reginald de Warren, French consul-general in Philadelphia.

Charles-Joseph Bonaparte, grandson of Napoleon's youngest brother Jerome, accepted on May 21, 1905, an invitation from his friend of Harvard days to join the excutive. The friend was Theodore Roosevelt.

Before announcing the appointment, President Roosevelt had the State Department make discreet inquiries in Paris to see whether the French government would object to a Bonaparte being a U.S. cabinet minister. Paris replied favorably. Bonaparte became secretary of state for the Navy July 1, and attorney general following Roosevelt's reshuffle in 1907.

Bonaparte's father was born of a marriage so fiercely opposed by Napoleon that the emperor obtained a civil annulment almost immediately and, after considerable difficulty, annulment by the Roman Catholic Church.

The emperor's brother Jerome, ancestor by his second marriage of the present senior member of the family, Prince Napoleon, was only 18 when he met Elizabeth Patterson, the beautiful daughter of a rich Baltimore family. The young lieutenant ignored the opposition of the First Consul of France to his planned marriage, left his post as second-in-command of the frigate "Epervier" (Hawk) and was married to Elizabeth by the Catholic archbishop of Baltimore on Dec. 24, 1803.

Despite the pleas of his mother and most of his other brothers and sisters, Napoleon remained adamantly opposed to the marriage, which ran counter to his plans for his brother.

He obtained a civil annulment, as Jerome married underage without his mother's consent and, failing to obtain the consent of Pope Pius VII, finally had the archbishop of Paris grant the religious annulment.

Jerome finally sailed with his pregnant wife to Lisbon in March, 1805, to see Napoleon, by then emperor, in an effort to win him over. But he was summoned under escort to Milan, where, after 11 days, Napoleon imposed his will. Jerome later became king of Westphalia in Germany.

Elizabeth was sent to England, where her son Jerome Napoleon was born July 7. Elizabeth and Jerome only saw each other once again—it was a chance encounter in a museum in Florence.

Jerome Napoleon's son, Charles-Joseph, the future secretary of the Navy, was born almost 21 years later. He was educated at the French school in Baltimore and obtained his doctorate of law from Harvard in 1874.

President Roosevelt pushed him into Maryland politics, though he showed little enthusiasm despite success at the polls. The president first enrolled Bonaparte as a member of the executive council of the Federal Commission on Indian Affairs, which led Bonaparte to make a thorough tour of the reservations and write a stinging report on conditions there, which he described as "a shame."

Then came cabinet rank.

He took steps to ensure that the U.S. Navy was respected at home and abroad. One of his first acts, doubly symbolic, was to ask France in 1906 to return the remains of John Paul Jones to the United States. They have been at the Annapolis Naval Academy since 1908.

Bonaparte was attorney-general for two years until the end of Roosevelt's administration, then returned to his legal practice in Baltimore. During World War I, he opposed U.S. intervention in the war, and later opposed foundation of the League of Nations. Bonaparte died June 28, 1921, without issue.

# PEOPLE:

## He's Britain's No. 1 Face on a Beer Mat

Chalk it up to loyal beer-drinkers. When the British Beer Mat Collectors Society conducted a poll for the top ten faces people would like to see on beer mats in 1970, Britain's Chancellor of the Exchequer Roy Jenkins topped the list. Jenkins edged out none other than Eva Rueber-Staier, the Austrian beauty who last week was chosen Miss World. The society insisted the choice of Jenkins demonstrated members had no complaints about a recent rise in the price of beer.

Roy Jenkins

* * *

Bearded Beatle John Lennon has been asked to play the role of Jesus Christ in a pop musical to be staged in London's St. Paul's Cathedral. He says he may accept the offer if his wife, Yoko Ono, is allowed to play Mary Magdalene. The musical, called "Jesus Christ," is based on the last six days of Christ's life. "We are bound to upset a few people but we don't want to annoy anyone. He (Lennon) is sincere in his effort for peace," said producer Andrew Lloyd-Webster. Last week, Lennon returned his Member of the British Empire Medal to Buckingham Palace to emphasize a plea for peace in Biafra. Said the dean of St. Paul's, the Very Rev. Martin Gloucester Sullivan: "Why should I have an opinion? I am interested in what the musical's organizers are doing."

* * *

She didn't like the old chair she'd bought at an auction in Chilliwack, British Columbia, so June Berg set it afire. Her children stayed to watch it burn and Mrs. Berg returned to her housewifely chores. A short time later, the children brought her handfuls of currency which were revealed in the innards of the chair as the fire blazed away. The family recovered $1,100 from the remains.

* * *

Peter Townsend, World War II fighter ace and former companion of Princess Margaret, has taken to the air again. This time he's emceeing a French-language show at the Paris studios of Radio Luxembourg. Content of the program: music mixed with chatter about what the French think of the English and vice versa. His partner in the half-hour show is French fashion journalist Juliette Boisrivaud. Townsend now lives near Paris with his Belgian-born wife and their five children.

* * *

"It's strange. I never believed in fairy tales, but at this moment I feel like Sleeping Beauty in the arms of her Charming who got there time to save her." With happy words pop singer Marianne Faithfull—sometim friend of Rolling Stone Mick Jagger—announc Milan her prince was Schifano, a 32-year-old and movie director. Miss full took the occasion t claim the end of her career. Said she: "I don anything to do with that A singer is a being withc sonality, an automaton has terrible influence admirers."

* * *

A white man suspe hiding in Cindy Bu closet and then kidnapp singer in the Negro po group. The Supremes' dered to Las Vegas yes terday. He was Charles 28, a caretaker in a Los apartment complex from Miss Birdsong was a Wednesday.

* * *

After announcing We she'd reached a milli property settlement wit cho Marx, fashion mod Marie Marx yesterday Santa Monica, Calif., Groucho complained ab cooking at Christmas last year. Claiming cruelty, Mrs. Marx, 38, her husband as saying can't you cook like th trading you in on a n and a new wife." The was granted without from the 78-year-old cc They were married in separated last January.
